Abstract

18th verses, 24 verses, 25 verses of Hanuman Chalisa, reality, not paradoxical, Hanuman Chalisa 40 verse is Scientifically proven. This is written by Goswami tulsidas in Ramcharitramanas in Sunderkand. It is so because in Hanuman Chalisa firstly calculated the distance between the sun and Earth (153600000 km) (18th verse). Our ancient holy monks have a good knowledge of Science, yoga, culture and Sadhna or meditation. They utilise equinoxial and sidereal estimation during solar eclipse to calculate this. Albert Einstein also suggested for calculation by taking the Sun and velocity of light as a frame of reference. According to Aadi guru Shankracharya observer (nearby star) affects the observation (wrt Sun) during this time. Because of this reason calculation of Solar year In 'Surya Sidhant' is 365 days, 6 hours, 12 min and 36.56 sec. Which is only 1.4 sec off from modern value. Duration of Day and night is 23 hours, 56 min and 4 sec which is 4 min shorter than modern value. This is because of the quantum delayed choice observer effect of nearby stars. However Lunar years vary. The concept of Einstein's "Energy may create matter" is mentioned in Vairabh Tantra Sanhita (Rudraktantra Sanhita). In the lab, we can easily show this through the Young double slit experiment and polarization of monochromatic light.

It is a misconception about the

fiction story of the grandfather paradox of Albert Einstein. In this when a grandson goes into the past through time travel from the present and kills his grandfather then the intermediate reality vanishes. In reality, it is not possible which is given in these 24 verses. In this case (i) the entropy of the grandson will be greater than before because of the second law of thermodynamics which depicts the Entropy of the Universe increases and (ii) the Unidirectional arrow of time. (iii) Entropy is a Scalar quantity means if displacement becomes zero even then its value is always additive. (iv) Entropy is a thermodynamic function (v) When goes into the past new reality or matter will be created -Stephen Hawking (vi) when goes into past their arrow of time line will be different. So in this verse by calculating the sun's distance from earth and good knowledge of the Holy book Goswami Tulsidas only wants to say that positive Scientific thinking and belief in good karma and faith in the well wishes of God can melt and hence vanish misconception. So this verse does not indicate or favour any type of Paradox or Superstition. In a story related to this (verses 24) a devil named Triembkasur had god blessing from Lord Brahma. Lord Vishnu and Lord Shiva to make a clone of anything. He utilises his blessing in wrongly make clones of these God starts fighting with them. He has a capacity to create multiverse. When Hanuman was appeared before them he has build their clone of Hanumanji who is slightly black colour. At three lord convinced them to do better work. Clone of Hanumanji on pleasure of accept the proposal of God but because of his devil energy he cannot perform betterly. In this case hanumanji itself make his own clone and combine with the clone of Triembkasur made Hanuman Clone and unite together. After that All three Lord Brahma. Vishnu and Shiva combinedly gave them blessings. In this way, Shyama Hanumanji was created. It is believed that he can melt all types of negative effects on mankind who worship them. In this case, Three three-dimensional concepts with Tringle law of vector addition along with the presence of a multiverse [more than one Lord Brahma (God of Time) Vishnu (Entropy) and Shiva (Black body)] and positive (Clone of Hanumanji) and negative energy (clone of Triembkasur) is mentioned (Dirack Law). In the ancient times in Vairabh Tantra Sanhita (Rudraktantra Sanhita) mentioned energy create matter. The holy monk was so non-violent, eco-friendly clean, green, peace, prosperity and humanity lover (25 verses) that he has not suggested or favour the mechanism of matter may create energy. Because they knew it may cause annihilation ex the Hiroshima and Nagasaki attacks during World War 2. He has also the Knowledge of light pollution (gosvaami tulaseedaas krt sankatamochan hanumaanaashtak-1). Due to light pollution, Dung beetles have a problem in searching locant of their niche. They use milky way galaxies light. Presence of Compound eye mosaic vision a special feature of arthropods make them possible. This is the best natural example of Shankracharya's Quote observer affects the observation. This means yoga, meditation and Sadhna may

uplift the prosperity of human beings and any nation including of flora and fauna and the whole Biosphere. In Panchdashi Granth it is mentioned that any natural phenomenon in reality may feel a miracle if we have no idea of the Scientific reason behind this but as the time passes it will feel reality. In Hanuman Chalisa "Vidyavan guni ati chatur Ram kaj karibe ko aatur" (7) is mentioned. "Jaay Hanuman gyan gun sagar" [2] means he is the God of wisdom. "Sukshama roop dhari siyahi dikhawa vikat roop dhari lank jarawa" this shows his adaptability skill. "Laaye sanjivan lakhan jiyaaye" means he has the knowledge of herbs also. "Raam kaaj karibo ko aatur" "Raam kaaj kinhe bina mohe kaha bishram". This shows his unidirectional dedication and devotion towards Lord Ram. "Tum upakaar sugreewahi keenha, raam milaai raja pada deenha" in this verses of Hanuman ji shows his intuition power of anything happening in future. Sugreev suspected Rama & Laxman, who were carrying archeries with them, to be sent by Bali to kill him. Thus, he ordered Hanuman to kill them. Before following the order, Hanuman checked whether this action was needed. Following his intuition to establish the real identity of Rama & Laxman, he approached the two disguises and discovered that Rama & Laxman were searching for Goddess Sita, who was kidnapped by Ravan. He found his intuition power that shows its reality in future. Mahavir Vikram Bajrangi, Kumati nivar sumati Ke sangi means he is physically, and mentally strong and believe and adopts satsang and follow positivity. Each and every line of Hanuman Chalisa is Scientifically proven and does not have any feasibility of a miracle. This is the Gems of the holy book Ramcharitmanas written by Goswami Tulsidas.

Content:-

Scientifically proven divine holy Hanuman Chalisa

Shrii-Guru Carann Saroja-Raja, Nija-Mana-Mukura Sudhaara |
Barannau Raghu-Bara Bimala Yasha, Jo Daayaka Phala-Caara ||
श्रीगुरु चरण सरोजरज, निजमनमुकुर सुधार ।
बरणौ रघुबर बिमल यश, जो दायक फलचार ॥

Buddhi-Hiina Tanu Jaanike, Sumirau Pavan Kumaar |
Bala Buddhi-Vidyaa Dehu Mohi, Harahu Kalesha Vikaar ||
बुद्धिहीन तनु जानिके, सुमिरौ पवन कुमार ।
बल बुद्धिविद्या देहु मोहि, हरहु कलेश विकार ॥
meaning:-

O Pavan Kumar (Hanuman), I meditate on you, considering myself ignorant. Grant me Strength, Wisdom and Knowledge, and Remove my Afflictions and Blemishes.

Jay Hanumaan Jnaan Gunn Saagar |
Jai Kapiis Tihu-Lok Ujaagar |1|
जय हनुमान ज्ञान गुण सागर ।
जै कपीस तिरहु लोक उजागर ॥
Raama-Duut Atulit Bala-Dhaamaa |
Anjani-Putra Pavan-Sut Naamaa |2|
रामदूत अतुलित बलधामा ।
अंजनि-पुत्र पवन-सुत नामा ॥

meaning:-You are the messenger of Sri Rama and possess immeasurable power.
You are called Anjani-Putra (son of Anjani) and Pavana-Suta (son of Pavana, the wind god)
Mahaa-biir Bikrama Bajarangii |
Kumati Nivaar Sumati Ke Sangii |3|

महावीर बिक्रम वजरंगी ।
कुमति निवार सुमति के संगी ॥
Kancan Barann Biraaj Subeshaa |
Kaanan Kunddala Kuncita Keshaa |4|
कंचन वरण बिराज सुवेशा ।
कानन कुंडल कुंचित केशा ॥
Haath Bajra Au Dhvajaa Biraajai |
Kaandhe Muuj Janeuu Saajai |5|
हाथ बज्र औ ध्वजा बिराजै ।
काँधे मूँज जनेऊ साजै ॥
Sankar suvan kesri Nandan|

Tej prataap maha jag vandan|6|
शंकर सुवन केसरी नंदन |
तेज प्रताप महाजगवंदन ॥
Vidyavaan guni ati chatur|

Ram kaj karibe ko aatur|7|
विद्यावान गुनी अति चातुर |
राम काज करिबे को आतुर ॥

Prabu charitra sunibe-ko rasiya|
Ram Lakhan Sita man Basiya|8|

प्रभु चरित्र सुनिबे को रसिया |
राम लखन सीता मन बसिया ॥

Sukshma roop dhari Siyahi dikhava|

Vikat roop dhari lank jarava|9|

सूक्ष्म रूप धरि सियहि दिखावा |
बिकट रूप धरि लंक जरावा ॥

Bhima roop dhari asur sanghare|

Ramachandra ke kaj sanvare|10|

भीम रूप धरि असुर संहारे |
रामचंद्र के काज सवारे ॥

Sab par Ram tapasvee raja|

Tin ke kaj sakal Tum saja|27|

सब पर राम तपस्वी राजा |
तिन के काज सकल तुम साजा ||
Aur manorath jo koi lavai|

Sohi amit jeevan phal pavai|28|
और मनोरथ जो कोई लावैं |
सोई अमित जीवन फल पावैं |
Charon Yug partap tumhara|

Hai persidh jagat ujiyara|29|
चारों युग परताप तुम्हारा |
है परसिद्ध जगत उजियारा ||
Sadhu Sant ke tum Rakhware|

Asur nikandan Ram dulhare|30|
साधु संत के तुम रखवारे |
असुर निकंदन राम दुलारे |
shta-sidhi nav nidhi ke dhata|

As-var deen Janki mata|31|
अष्ट सिद्धि नौ निधि के दाता |
अस वर दीन्ह जानकी माता ||

Ram rasayan tumhare pasa|
Sada raho Raghupati ke dasa|32|

राम रसायन तुम्हरे पासा |
सदा रहो रघुपति के दासा ||

Tumhare bhajan Ram ko pavai|
Janam-janam ke dukh bisraava|33|

तुम्हरे भजन राम को पावैं |
जनम जनम के दुख बिसरावैं ||
Anth-kaal Raghuvir pur jayee|

Jahan janam Hari-Bakht Kahayee|34|

अंत काल रघुबर पुर जाई |

जहां जन्म हरिभक्त कहाई ||

Aur Devta Chit na dharehi|

Hanumanth se hi sarve sukh kareh|35|

और देवता चित्त न धरई |

हनुमत सेई सर्व सुख करई ||

Sankat kate-mite sab peera|

Jo sumirai Hanumat Balbeera|36|

संकट कटै मिटै सब पीरा |

जो सुमिरै हनुमत बलबीरा ||

Jai Jai Hanuman Gosahin|

Kripa Karahu Gurudev ki nyahin|37|

जै जै जै हनुमान गुसाईं |

कृपा करहुं गुरुदेव की नाई ||

Jo sat bar path kare kahi|

Chutehi bandhi maha Sukh hoi|38|

जो सत बार पाठ कर कोई |

छूटहि बंदि महा सुख होई ||

Jo yah padhe Hanuman Chalisa|

Hoye siddhi Sakhi Gaureesa|39|

जो यह पढ़ै हनुमान चालीसा |

होय सिद्धि साखी गौरीसा ||

Since this is scientifically proven verses so only by reading only,even not, chating ,menifestation and meditation even then this is fruitful.

Tulsidas sada hari chera|

Keejai Nath Hridaye mein dera|40|

तुलसीदास सदा हरि चेरा |

कीजै नाथ हृदय महँ डेरा ||

Saint Tulsidas says “ Respected Lord Rama I am your great disciple, please be always in my heart & soul”.

*Couplet**Pavan Tanay Sankat Harana**Mangala Murati Roop**Ram Lakhan Sita Sahita**Hriday Basahu Soor Bhoop*

दोहा

पवनतनय संकट हरण, मंगल मूर्ति रूप |
 राम लखन सीता सहित, हृदय बसहु सुर भूप ||

Pawanputra (Son of Pavan Kumar), Sankatmochan (Destroyer of sorrow), Mangalmurti you are in the heart & soul of Lord Ram, Sita, Lakshman always.

Mentioned about the Light pollution :-As the advancement of technology, depletion of the ozone layer, greenhouse effect global warming and pollution that causes light pollution. In clear nights nowadays, the number of stars twinkling in the sky decreases because of the haziness of reflected and scattering of light by charged particles, suspended particulate matter, telecommunication etc,

For ex Global warming

It is a first-order reaction because it depends mainly upon the amount of CO_2 in the atmosphere which regularly increases exponentially

$$X = X_0 2^n$$

where n= Number of time period at which the amount of CO_2 is doubled ie decrease in availability of O_2

$$= \frac{t}{T_{doubled}} = \frac{\text{total time taken}}{\text{time period at which the amount of } CO_2 \text{ is doubled}}$$

Let us suppose

X=Amount the amount of CO_2 after n Time doubled life period.

X_0 =Amount of CO_2 in initial state

The time at which the amount of CO_2 is doubled can be given by the equation.

$$X = X_0 e^{-\lambda T}$$

Here -ve sign indicates decrease in O_2 as the amount of CO_2 is doubled

Amount of CO_2 evolved is completely statistical. It varies with time. So an average time is considered. It can be proved through the equation that average time $\bar{t}$ is inversely equal to $1/\lambda$

$$\bar{t} = 1/\lambda$$

Amount of CO_2 evolved in an average time is given by the equation

$$X = X_0 e^{-\lambda \bar{t}}$$

$$X = X_0 e^{-\lambda \times 1/\lambda}$$

$$= 2.718 X_0 \quad (e=2.718)$$

$$\% X = 271.8 X_0$$

No of reflection of the radiation by the earth surface is given by the equation

$$n = \frac{Pt\lambda(c^2)}{h(c^2 - v^2)}$$

Further we know that of absorptance, reflectance and transmission of a radiation is equal to one.

$$a + r + t = 1$$

Due to light pollution reflection of energy by the earth's surface is less because of absorption of energy by the earth surface is less because of absorption and scattering of energy by the atmospheric gases. So the amount of energy absorbed can be decreased by increasing their transmission between the the gas particles of the medium under the limit of escape velocity of the particle. It helps in increasing entropy at a constant T. So that the internal energy of the earth can be maintained.

$$r = 1 - (a + t)$$

Due to light pollution

$$a + t > 1$$

$$\Rightarrow a > 1 - t$$

So absorptance can be decreases by increasing transmission.

Further ,the amount of transmission of energy between the particle at a distance x distance apart can be represented by the equation

$$t = t_0 e^{-\mu x} \text{-----(1)}$$

The amount of absorption of energy by the particle is given by the equation

$$a = a_0 e^{-\mu x} \text{-----(2)}$$

Under study state when the system is resonance establised ,energy absorbed by the particle is equal to the amount of energy transferred to the other particle.

From eq (1) and eq (2) ,we get

$$a = t$$

$$a_0 e^{-\mu x} = t_0 e^{-\mu x}$$

$$a_0 = t_0$$

So the particles transfer the whole energy they absorbed to other particles,so the temperature of the gas-particle and haziness due to reflection and scattering does not change. In this verses whole God prays to the Lord hanuman because he is Son of Lord Pawan .He is also called Pawanputra(Anjani-Putra (son of Anjani) and Pavana-Suta (son of Pavana, the wind god). For example, if light pollution increases then the existence of many flora and fauna have to be threatened. For example, Dung beetle uses Milky Way light for their physiological function inside the niche.

Prove of

Yug sahastra jojan par Bhanu
Leelyo tahi madhur phal janu [18]

जुग सहस्र जोजन पर भानु ।

लील्यो ताहि मधुर फल जानू ।।

Modern calculations in 20th century estimate the distance to be somewhere around **23455 times the radius of Earth** (149,431,805 kms assuming radius of Earth to be 6371 kms).

$$1 \text{ Yug} = 12000 \text{ years}$$

$$1 \text{ Sahastra} = 1000$$

$$1 \text{ Yojan} = 8 \text{ Miles}$$

$$\text{Yug} \times \text{Sahastra} \times \text{Yojan} = \text{par Bhanu}$$

$$12000 \times 1000 \times 8 \text{ miles} = 96,000,000 \text{ miles}$$

$$1 \text{ mile} = 1.6 \text{ kms}$$

$$96,000,000 \text{ miles} = 96,000,000 \times 1.6 \text{ kms} = 153,600,000 \text{ kms to Sun}$$

This calculation is closer to the modern value

According to Stephen Hawking (on the basis of Friedmann's assumption we can draw three graph)

According to Stephen Hawking, we cannot know the nature of universe before we count the number of black holes. Irrespective of its nature it must persist up to 10,000 years. In the utkal khand of Scandpuran, it is already mentioned. About the existence of lord Hanuman it is believed that Hanumanji met with Matang Aadivasi of Vidru Mountain present in Sri Lanka in the time gap of 41 years. It is believed that Hanumaji has give mantra to him

कालतंतु कारेचरन्ति एनर मरिष्णु, निर्मुक्तेर कालेत्वम अमरिष्णु।

This was already known (1 Yug=12000 years) to our holy monk. He utilises the equinox observation (vernal equinox 20-21 March and autumn equinox September 22-23) and sidereal day measurement during solar ellipse to calculate in this cases by utilising delayed choice effect and observer effects. In this nearby starlight tangent on the equinox position of the Earth as shown in Fig. Here observer affects the observation because as the nearby starlight touches the tangent then due to which a quantum fluctuation arises due to Heisenberg's uncertainty, as it locates their equinox position its momentum.

affected. During a solar eclipse when any monk observes utilities this natural phenomenon to locate its tangent point. He can observe as light reflected from this tangent position to the observer. During this, a small amount of light is utilised to locate its position. As a result of this uncertainty in momentum arises. The reason for accurate calculation is, holy monk is because of two main reason

1. At equinox position nearby starlight tangent on the surface of the earth are perpendicular to the line joining earth and Sun. This helps in choosing initial locant. It helps them to follow arrow of time as depicted by Stephen Hawking.

2. According to Albert Einstein we can use velocity of light and position of Sun as a frame of reference. This was the reason that he utilizes solar eclipse time. At this time flipping effects of earth in

orbital motion is least .So this helps in minimum Heisenberg's uncertainty ,delayed choice and observer effects .

The expression flipping may also be stated in the following form

$$V=V_0(1 - \frac{\omega^2 \gamma^2}{2c^2})$$

If we represent the difference of potential of the centrifugal force between the position of the clock on earth and the centre (Sun) by φ ie the work,considered negatively ,which must be performed on the unit mass against the centrifugal force in order to transport it from the position to its original previous position

$$V=V_0(1 + \frac{\varphi}{c}), \text{ Here } \varphi = \frac{\omega^2 \gamma^2}{2}$$

Now $\varphi = -K(\frac{M}{R})$, where K is the Newton's constant of gravitation with reference to the Sun ,M is the mass of the mass of the heavenly body and R is the radius of this.

So the equation of red shift can be given by

$$\frac{V_0 - V}{V_0} = \frac{KM}{c^2 R}$$

V_0 = number of ticks of the clock per unit of time relative to Sun

V = Number of ticks of the clock per unit of time on the earth

M = Mass of the heavenly body

R = Radius of the heavenly body.

Furthermore to better clarification , Let us suppose in Lorentz transformation principle at equinox position a light signal sent out from the origin of an inertial frame (nearby star or black body) K at the time $t=0$. It will propagated according to the equation

$$r=ct$$

$$r = \sqrt{x^2 + y^2 + z^2} = ct$$

$$x^2 + y^2 + z^2 - c^2 t^2 = 0 \text{-----1}$$

Transmission of light signal from another initial coordinate, Sun, k^i simultaneously at $t=0$ because of equinox position. It will also propagated according to the equation

$$r' = ct'$$

$$r' = \sqrt{x'^2 + y'^2 + z'^2} = ct'$$

$$x'^2 + y'^2 + z'^2 - c^2 t'^2 = 0 \text{-----2}$$

The Law of the transmission of light in vacuum is satisfied both for the reference body k and for reference body k' in Lorentz transformation

$$x^2 + y^2 + z^2 - c^2 t^2 = x'^2 + y'^2 + z'^2 - c^2 t'^2$$

since

$$r=r'$$

$$ct=ct'$$

This is the equation to calculate distance of sun from earth .

Explanation of verses 25:-

Nase rog harai sab peera

Japat nirantar Hanumant beera [25]

॥ २५ ॥

नासै रोग हरै सब पीरा ।

जपत निरन्तर हनुमत बीरा ॥ २५ ॥

In Hindu mythology the avatar of Rama is belived to be 5114 years back in which relative position of Planet has mentioned in Aries rashi Sun was present, in Capricorn rasi mangal was present, in Libra rashi Saturn in Pisces rashi sukra was present. This time period is absolute time period applicable on Solar system as well nearby stars. Relative position of this planet may be assumed as Einstein's 4 D space time lattices. Chatting of 108 times indicates that this is the galactic ratio of the planet. Maintaining of its ratio is essential for life, this may be disturbed by global warming. This also refers that Moon is a part of Sun in

earlier time, because as we divided the distance of Sun and earth by the diameter of Sun its value comes closer to 108. Similarly when we divided the distance of earth to moon by the diameter of moon again its value comes closer to 108. Means in equinox position when we scratch up the Gaussian surfaces and measure the light cone that subtended the solid angle on the earth are in the fixed ratio. This gives the astronomical importance of Solar and moon eclipse. This may more clear by knowing that in solar years the earth rotates on its axis about 360 times. This shows variation tilt of earth on its axis and elliptical shape to maintained symmetry of the galactic light cone and distinct and discrete energetically finite nature of space time lattice, which have its own Brahma.

Explanation of All zero are not concurrent:- To understand this concept we try to construct a circle of radius R. At every point on its circumference its velocity is expressed by

$$\vec{v} = \frac{d\vec{s}}{dt}$$

The orientation of stereospecific locant are different as its position changes. The velocity of the particles is assumes to be zero ($dt \rightarrow 0$).

$$\vec{v} = \frac{d\vec{s}}{dt} = 0$$

For circular motion the final velocity may have an expression

$$v_2 = v_1 + 2u \cos \theta$$

For initial position, $\theta = 0^\circ$

$$v_2 = v_1 + 2u$$

As they move diagonally opposite point $\theta = 180^\circ$

$$v_2 = v_1 - 2u$$

To Brahma is the God of time and creation. In 8 th chapter of Bhagvat Geeta time cycle of our solar system is according to our Brahma. In Bhagvat puran it is mentioned that in different universe a unique distinct and discrete Brahma is present. Means it also gives us the presence of multiverse and relativistic nature of time period, although Krishna ie Black body or line of singularity is same for all Brahma. Since at the Equinox position the relativistic position of other planet on the different galaxies may have time period in fixed ratio, because light of black body or nearby stars may have same time tangent on its orbits. I axis. This helps in stereospecific alignment and transfer of mantra and atma in the form sukshma sareer or in the form of quantum beats, which are indestructible through worm hole. This why ancient monks have build different quality and frequencies of mantra, based on Pranav mantra Ohm ॐ **which represents projection of 4 D space on 3D energetically finite distinct universe as proved above. The reason of this difference is the different galactic locations of earth and other planets throughout solar year, and different for different rashi. So mantra depends on the Rashi of**

the jatak.Above mantra is for healthy long life and well being. Since Hanuman is the disciple of Sun and his wife name Suvarchala Devi, the daughter of the Sun god.It is belived to be their existance in nearby star. The Valmiki Ramayana address the account of Lord Hanuman's marriage with Suvarchala Devi. The Suvarchala Devi temple is located on Khammam region of Telangana. In this temple, Lord Hanuman is present with his wife. So in Ramcharitmanas this mentioned that

और देवता चित न धरई, हनुमत सेई सर्व सुख करई ॥ 35॥

So prence of Hanumanji in present with his wife as well because Mata Sita has given Hanuman ji blessing of long life with kripa of Lord Rama (pronoun of Krishna ie black body/line of singularity/ Big bang) who is the creator of whole Shristi in which multiverse present .Hanumanji is the disciple(entropy)who is resposible for nature(Brahma) and natural phenomena(lord hanuman with is wife and Guru Sun in our Solar system).Baan Ganga present in Swetbaan Rameshwaram is the reality of Ramayana even accepted by the state government also.In between the sea.this well's water is not salty but normal.

चोपाई

अजर अमर गुननिधि सुत होहू। करहुँ बहुत रघुनायक छोहू॥
करहुँ कृपा प्रभु अस सुनि काना। निर्भर प्रेम मगन हनुमाना॥2॥

भावार्थ

हे पुत्र! तुम अजर (बुढ़ापे से रहित), अमर और गुणों के खजाने होओ। श्री रघुनाथजी तुम पर बहुत कृपा करें। 'प्रभु कृपा करें' ऐसा कानों से सुनते ही हनुमान जी पूर्ण प्रेम में मग्न हो गए॥2॥

So this clarify that chating of Lord hanuman can make person prosperous,peaceful and health long life.

Bhoot pisach Nikat nahin aavai

Mahavir jab naam sunavai sheer [24]

Scientific Explanation with equation

चोपाई

भूत-पिशाच निकट नहीं आवे। महावीर जब नाम सुनावे।

नासै रोग हरै सब पीरा। जपत निरंतर हनुमत बल बीरा॥

Bhoot pisach Nikat nahin aavai

Mahavir jab naam sunavai ||24||

Explanation with equation:-

The verses [24] above is not paradoxial or illusion .It is devine,scientifically proven.A famous fiction grandfather paradoxial story of Albert Einstein is not possible in reality because of the following reason:-

1. Albert Einstein's 4D space-time graph
- 2.Unidirectional motion of the time or evolution should follow the arrow of time with natural selection(Stepen Hawking
- 3.Heisenberg's Uncertainty principle
- 4.Our uiverse is energetically finite (1st law of thermodynamics)
- 5.Entropy of Universe always increases.
- 6.There is no possibility of the bidirectional movement of arrow of time in 4D space-time graph.
- 7.Velocity of light is relativistic in nature.So entropy should have chrteria to explain natural phenomenon because it is always increases.

8.In 4D space time graph we can move only to the future.If in Large hydrogen collider if we accelarated the proton closer to the velocity of light 99.9999 %.In this case time clock slow down.Panchavarnaswami temple(build up before 2000 years ago) in Tiruchirapalli in Tamilnadu have a design showing time travel

9. Because of entropy as grandson move into the past (if we consider string theory if we assume the possibility of higher dimension) and kill his grandfather. In this case there will be a creation of new type of matter.

10. In ancient holy monk Kalkbhusundi says that universes go in a cycle and Ramayana is approx 16 times in Treta Yuga and Mahabharata in Dwapara Yuga was 11 times repeated. According to Roger Penrose, the Universe undergoes from one cycle to another cycle in which entropy of the Universe increases. So in Adbhut Ramayana it is mentioned that the Ravana was killed by Sita. Means even for the same result process (natural phenomenon) may be different.

11. Concept of Entropic gravity - a way towards unification in physics (Paper Id IJCRT-1812068) concept is present in ancient holy book. It is believed that in Kailasha a hidden city is present called Gyanganj and Tibetan and Chinese called this city Sanghri. It is believed that in this place miniature of flora and fauna is present which is utilised by Lord Shiva for making new Universe again when they go from one cycle to another cycle.

Photon may create matter :- According to Lord Adi Guru Sankracharya "Everything in the material world including matter and energy is illusory and ultimately derived from the ultimate reality, Brahman". The concept of jeeva refers to the individual self, which is said to be distinct from universal self or Brahman. He has given the concept of Adwet.

Heisenberg argued that the idea of a unified reality, where everything is interconnected, is not just compatible with quantum mechanics but required by it.

To clarify the above concept of energy has capacity to create matter (adweta concept). We should have to consider following concept

1. Young double slit experiment and particle formation
2. Delayed choice effect of light and erase of the quantum sense (quantum beat)
3. Quantum entanglement and nonexistence of Einstein's spooky effect
4. Observer effect

In young double slit experiment when a coherent monochromatic light passes through the double slit they produce a dark and bright fringe on the screen.

First way- If we increase the number of slits up to n then the peak of fringe width increases and its width

decreases and finally in this process dark fringe width vanishes and finally particle(bright spherical fringe) appears. In this way we can construct spherical shape particle.

Here, For bright fringe

$$d \sin \theta = m\lambda$$

$$\text{Where } \theta = \frac{\lambda}{Nd \cos \theta}$$

$$\text{Intensity} = I_0 N^2$$

$$\text{No of secondary minima} = N-2$$

$$\text{If } N=3 \text{ then No of Secondary minima} = 3-2=1$$

$$\text{If } N=5 \text{ then No of Secondary minima} = 5-2=3$$

Second way:- In this we placed a polarising crystal at the front of double slit to make them horizontal and placed another polariser 90° about its direction of light then fringe width disappear. Now we placed another polariser Z in between polariser X and polariser Y at an angle of 45° (because projectile have maximum range at 45° , $R = \frac{u^2 \sin 2\theta}{g}$). Then we will see the spherical particle.

This is the practical example of quantum entanglement. In this experiment there is no delayed choice effect of light nor any observer effects are present in which there is a possibility of entropy exchange of observer and observation as their arrow of time line crosses each other. So the encryption of quantum beat are conserved irrespective of the distance how they are far apart. This was first observed by John Bell. This is the further drawbacks of the Einstein's spooky effects. It is just like the fiction story of Albert Einstein in which they enjoy the picnic and one of the friends are moving through the rocket in which cell phone was missing. When they come back everything is missing. His friends passed away and his grandson is present and even structure of park changes into colony. In the above cases since arrow of time line of coherent sources in double slit experiment are undisturbed. How this makes any sense of erasing functionality of quantum beat between them missing.

Now to understand the reason of the erasing of quantum beat, we construct a hypothetical small Gaussian surface in 4D space and squeeze them into a cylindrical shape in which one side screen A of an experiment is present and on the other side screen B, screen C, screen D are present at an angle of 45° . In this case we will see that the quantum information does not erase by phase change as an entangled pair of light strikes the target. Because by change of phase from $\sin 45^\circ$ to $\cos 45^\circ$ and vice versa have the same values and at this angle the range of an entangled projectile is also maximum. So after multiple reflection from the target particle nature of light will be maintained.

Relation between angle of twist θ and angle of shear φ

$$\varphi = \frac{R\theta}{l}$$

Twisting couple /unit twist or torque required to produce unit twist

$$C = \frac{\pi R^4}{2l} \quad \text{Hence } C = R^4 \alpha A^2$$

Work done in twisting/squeezing the cylinder through an angle θ is

$$W = \frac{C\theta^2}{2l} = \frac{\pi R^4 \theta^2}{4l}$$

At the axis of cylinder $\varphi=0$ and at the outermost shell $\varphi=$ maximum

$$\theta \geq \sin^{-1} \frac{1}{\mu} \Rightarrow \sin \theta \geq \frac{1}{\mu}$$

Let us suppose d be the diameter of the circular mouth of hypothetical Gaussian cylinder

Then from fig

$$\sin \theta \geq \frac{R}{R+d}$$

$$\frac{R}{R+d} \geq \frac{1}{\mu}$$

The intensity of finally obtained through cross section area of B is given by the equation.

$$I = I_0 e^{-\mu x}$$

$$I = 0.368 I_0$$

In the above scientific explanation it is clearly understood that Hanuman chalisa is Scientifically proven verses(40). In this divine energy change into reality, So in this Jo yeh padhe hanuman chalisa is mentioned in place of jo yeh bhaje hanuman Chalisa.

Classical Scientific approach to Understand Sadhna:-

Sadhna is a discipline in desired dimension of thought, belief and perception result in self healing (represented by coefficient n). It involves meditation, yoga, mantra chanting, Kundli jagran etc divine spiritual practices performed by an ancient monk. In this case, the holy monk utilizes (input) free spontaneous energy of the ultimate source of energy Brahman (term used by an ancient Shankaracharya refers to sun) of the system universe for their desired output. It is used for humanity, natural biodiversity flora and fauna healthy lifestyle so that evolution should follow the arrow of time with natural selection.

To understand this we use the law of probability and observer effect.

Let us suppose a person went to a holy monk and asked for the feasibility of any work X (about service, house, debt, mirage, business)

There may be three possibility arises

Y= yes feasible

X= not feasible

Z= may be

Here $Y > X = Z$ means Y is dominant over X and Codominant over Z(on the Quantitative Estimation of desire intuition of disease)

n=coefficient of thought,belive and perceiveness results in self healing

There may be six possibilty arises

$Y^n Y^n \rightarrow$ Definitely feasible

$X^n X^n \rightarrow$ Definitely not feasible

$Y^n Z^n \rightarrow$ May be feasible

$X^n Z^n \rightarrow$ May be feasible

$X^n Y^n$ -Both may possible

$Z^n Z^n \rightarrow$ May be possible

$$X^n + Y^n = Z^n$$

$$\frac{X^n}{(XYZ)^n} + \frac{Y^n}{(XYZ)^n} = \frac{Z^n}{(XYZ)^n}$$

$$\Rightarrow (YZ)^{-n} + (XZ)^{-n} = (XY)^{-n}$$

This is called Pierre de Fermat equation. The above equation clearly shows as amount of self healing increases the feasibility of desired result increases.

Lord Budha says don't believe anything because I say to you believe it if reason leads you to believe this.

Lord Budha had introduced the free energy cycle of 5 elements fire ,earth metal,water ,wood. This is based on the concept of Planet earth formation during Big bang. After the formation of The Sun (Ultimate source of Energy) as the outer reason of its far way from centre pathces of cloud starts cooling down gives rise to planet like etrth and lateron further cooling its natural satellite moon formed. At this time the atmosphere of earth have only simple elements like H,C,N,O that combines to form simple molecules like $NH_3, H_2, H_2O, CO_2, CH_4, N_2$ present. There is no presence of free O_2 at this condition. As the temperature goes down these cloud condense and start rain. In this way Ocean (Water) were formed. Lateron prebiont like Coaservet and heterotropic anoxgenic bacteric and thereafter blue green algae aerobic condition forms. As ecological succession going on finally plant (wood) and animals are formed. Our anicient monk have also the knowledge of the concept of genetic code if we combine the all the Sanchracharya temple and encircle into curve they form the Fibonacci shape. As we know the genetic code decifer by Hargovind Khorana derived from Fibonacci theorm. In temple of Varamurteeswarar located in Ariyaathurai showing the fertilisation process of sperm with ovum clearly depicted omnis cellula e cellulae. In Kundarum bhariva temple have a carving of showing foetus with umblical chord attached along with foetal position. It refers to ontogeny repeats phyllogeny. Missing link present in carving of the temple of Panchavarnaswami temple (build up before 2000 years ago) in Tiruchirapalli in Tamilnadu. Non existence of paradoxial based concept chand baberi of Rajasthan has total 3500 stairs. It is belived that a person goes inside does not come back with same root. no one can count number of pillar of Mahalakshmi temple of Kolhapur district of Maharastra. Vittala Temple is created to build celestial mind (alien frequencies) pillar ,have musical scale.
