Abstract: The golden opportunity for the golden human civilization is the bond of fraternity or brotherhood. The sense of brotherhood takes the human race to the pinnacle progress. The concept of “Brotherhood “is one of the most beautiful relations of human kind. It is one such thing that can turn the worst enemy into the best friend. Upgrade our brotherhood experience come to peace and security of the world society. Recently, one of the world’s vital issue is the fraternity and racial harmony. A sense of fraternity binds people together. We found clear signs of it in constitution of India. Rabindranath Tagore spoke of national as well as world brotherhood. Dr. B. R. Ambedkar said that fraternity as “a sense of familiar sisterhood and brotherhood among the citizens of India. Indian's sense of brotherhood or neighborhood is inseparable among Indians. Therefore, unity is its motto even though it is pluralistic. Recently there has been a crisis in world fraternity culture.

Index Terms - Brotherhood, sisterhood, neighborhood, communal harmony, fraternity.

I. INTRODUCTION

Brotherhood lives alone
In the mind every day
Like a relationship prone to doubt ---!

Why do movement for protection of brotherhood in society? Is brotherhood really far between world communities? To be honest, at this time, it has become very important to promote it to the world society. Now the known picture of that brotherhood is not seen. At present, we all seem to be closing our ears; no one hears the hurt words of brotherhood. No community sees it’s own faults. Only able to see the faults of others. Lay the blame at one's door. In this context, the fraternity crisis has taken strong shape among the people all over the world. But, apart from insults people mistakes can be corrected –teachers teach that.

Provocative comments of fundamentalists and political business men break the sense of brotherhood. And religious and party political consciousness is destroying the fraternity of civil society from within. Does not feel the pull towards the communal harmony fundamentalist and political traders. Radicals around the world are spreading hatred and hatred everywhere. And the governments of different countries are giving appropriate support to it. Turmoil is on the part of entrepreneurs, various inevitable arguments are clearly stated on their behalf.

There is a great lack of brotherhood among mankind. Due to which minority communities worldwide lack security. Minority issues that, it has become one of the places of politics. The communal harmony, mankind is repeatedly confused about it clash of communities, which is a prime example. It is a example of a India as well as worldwide.

In recent times, brotherhood crisis has hit the headline around the world. Brotherhood crisis is emerging every day in new countries all over the world. At this time, a lot of discussion has started about brotherhood in various circles. In one word, the fundamentalists do not want to know what it is. Fundamentalist leaders want to stay in power by spreading hatred.

There days the fuel of communalism is coming up in words. However, we could not understand the whole things. Radical forces, there are only threats, warnings and hatred in the face. Many people are making various comments to print their name in the newspaper. All in all, there is growing discomfort with the bond of brotherhood in the middle of the world.

The brotherhood of man (a feeling of friendship, between all the people in the world. The whole world now knows how dire the fraternity issue has become. How minorities (brother) have become victims of torture in different countries. Minorities' vs Majority competition is destroying the bond of sisterhood and brotherhood.

II. THE SUCCESSFUL STORY ON BROTHERHOOD AND INDIAN CONSTITUTION

The constitution of India is where the most successful story of brotherhood or fraternity. This is an extreme example of brotherhood. Fraternity is one of the most relevance subjects in the Indian constitution. India is a best example brotherhood country in the world and is home to a diverse population of over 140 million people of various communities.

The fraternity of Indian constitution is the keywords of the preamble. Fraternity as an ideological concept finds its birth in the French Revolution, as well as an express mention in the preamble to the Indian constitution. Path of Unity one of the biggest challenges for India. India is a pluralistic society. There is a multi-ethnic, multilingual, a multi-cultural, a multi-caste with a many political parties. Although, India is a multi-religious but India is a predominantly occupational secular country. The idea of fraternity finds mention in preamble to the Indian constitution, where “----fraternity assuring the dignity of the individuals and the unity and integrity of the nation “ is declared to be a constitutional goal”.

The preamble of the Indian constitution of India states that fraternity should assure the dignity of the individual and the unity of the nation.

Fraternity is one of the biggest challenges for India, include -social and cultural differences, religious or caste -based differences, economic disparities, political differences, lack of trust, failure of constitutional morality, educational disparities, regional disparities, language and cultural barriers etc. All in all, lack of mental harmony of all the people or citizens of India.

2.1. Minority and Fraternity:

The minority crisis has become evident around the world. Persecution of minorities in the President situation and the rise of religious fundamentalists has become an extreme issue. The minority group fueling in the country.

Minority issues are intended to drive a divisive politics, which is especially the case against the ruling group which communal harmony tradition is not respected. The minority security is dealing with country after country has become an absolute burden. As a result of the government's weak action, attack on them (minority) are increasing in the country.

A country cannot be run by teaching politics to a cat just like that, a country cannot be run by teaching politics to religious fundamentalists. And this is where there is an extreme lack of brotherhood.

2.2. Extremism, Anti-social and Fraternity:

Extremism and anti-social have also become obstacles to brotherhood in many ways. Society has become accustomed to being jealous of each other's happiness. It's like a civil-war situation now. The extremism is extorting financial demands from minorities. And anti-social is harassing minorities in various ways. As a result, there is turmoil in society and state system.

III. RELIGIOUS AND COMMUNAL CONFLICT INDIA AND THE WORLD

Social harmony is governed by whom? The social group is the actor of brotherhood. It depends on them. If the conflict is strong in the religion sectarian diverse word, peace, stability and security becomes a challenge. People stay at the top of politics and at the top of religion, incitement of communalism is going on from those two areas. Because of that, it has become increasingly crisis-filled. Fraternity and communal harmony conflict has become a mental illness in the human race. It is spreading like a contagious disease from one country. to another, one state to another, one village to another, one neighborhood to another. So, fraternity is a distant subject, at this time. There is only a flurry of opposing comments running around.

IV. BROTHERHOOD RELATIONSHIP INDIA AND NEIGHBORING COUNTRY

The fraternity relation between India and the neighboring country. India and her neighboring country upgrade their brotherhood experience. We are upgrading our fraternity experience continuously.

The party class shows brotherhood on the face but there is no brotherhood in the heart. The majority class and the ruling class in the face -communal harmony in the mouth. Everyone should understand fraternity's value.

V. FUTURE SITUATION: HOW TO SOLVE THE PROBLEM?

Fraternity relationship needs to be renewed between different countries around the world, specifically between neighboring countries. The brotherhood will make it easier to live and move better in the coming days-hopefully. Diplomatic relations between countries need to re-strengthened. A long-term solution to the problem must be found. Service matters should be normalized between all countries. Among countries, whose crisis is not only political, but in all areas. So, in all cases, rebuilding the relationship is very important.

Governments should deal with this situation and ensure peace and cooperation within the country. Humanity and brotherhood destroy violence among nations. So, all nations must be free from violence. Brotherhood education alone will help build a strong society in the future. When will civil society understand this truth? Even today the bond of brotherhood has not been established anywhere in mankind. This is an obvious fact or naked truth.

VI. CONCLUSION

Brotherhood is an essential thing for mankind. A message of brotherhood –the message of happiness in our society –I am sure. But the word brotherhood is in the mouth, not in the heart. Urban and rural human mentality is a vivid example of this.

Slogans or comments one after the other, which is practically unprecedented. Struggle for protection of brotherhood in recent context, religious communities, all political communities, all the ruling communities (majority group). Everyone should understand fraternity's value. Fraternity has declined in all professions in all institutions (education, business). Even food habits have deteriorated. The case is constantly in the headlines. And become a delicious thing in people's daily life. There is a need to teach brotherhood as a trick to the modern generation.

I hope that the world will not see turmoil for the demand of communal harmony. As it happened in the demand of justice. However, I and we waited for fraternity among the people return.

It must be remembered that no society can survive anywhere in the world without brotherhood or sisterhood.
