## Theory Of The Nature

Author Name - Haradhan Roy

**ABSTRACT:-** Fixed matter, Energy of Nature, matter with various characteristic shapes produced from Moving matter, Particles of light, Sun, Stars, main elements of Nine-layered nature, Planets, Atomic level, Satellites, Dimensions of nature of main elements of Nine-layered nature, Living world, Human beings, Eternal nature etc. These discussed by the special question, point, heading and paragraph arrow symbol. Namely --> 1□ **First of all, what was the before expanded of the matter particle of light in the vacuum from darkness ? (Figure 1/2)** 2□ **Secondly, where did the state of light particles come from in vacuum ?** 3□ **Mathematical proofs and calculations of infinite terms (Figure 3)** 4□ **Thirdly, why is the explanation of tiny particles of light originating from particles of light measured in the vacuum of Eternal sky ? (Figure 4,5)** 5□ **Origin of favorable and unfavorable substances** 6□ **Origin of animals on the planet called on Earth of Nature (Figure 6,7)** 7□ **How did the senses organ originates** 8□ **How did species originate** 9□ **Explanation of the time and atoms of all shaped visible light particles.**

### INDEX TERMS:-

- Elements of Nature /- Only two elements exist in Nature --- 1. Shapeless, Boundless fixed Vacuum form darkness Eternal sky element . 2. Shaped, bounded forms of energy in nature are particles of light in motion . Shaped light particles later evolved into different shaped material with different properties, behaviors .
- The Nine-layered principal elements of Nature /- Nature refers to all the main elements of Nature . Viz ---> Eternal darkness form vacuum sky, Soil, Water, Fire, Air, Wind's mind, Wind's intellect, Wind's haughtiness and internal vacuum .
- Visible light energy in Nature /- visible light energy in Nature refers to the energy of light generated by motion, sound, attraction, light and the sum total of visible light exempt of empty space .
- Visible particles in Nature /- visible particles in nature refers to any material having both light dissipating and light absorbing behavior, characteristic favorable, unfavorable matter with the exception of the Eternal vacuum sky .
- Expansion of Nature's particle energy /- Nature's sun a star is defined as the tiny particles produced by the enormous accumulated of particles of light in the static, shapeless, darkness sky .
- Favorable substances and unfavorable substances of Nature /- favorable substances and unfavorable substances of Nature refer to here, favorable substances are the Nucleus of atoms, Sun, all the Stars . Unfavorable matter is defined as the shaped, bounded Planets, Satellites, Electron of atoms and the shapeless, Boundless darkness form of vacuum element .
- The Nine-layered of nature are the main elemental dimensions of Nature /- here are meant ---> subtle smell of Soil, juice of water, various forms of flame of the Fire etc..... are arising from Soil, Water, Fire, Air, Wind's mind, Wind's intellect, Wind's haughtiness, Internal vacuum and Eternal darkness form vacuum .

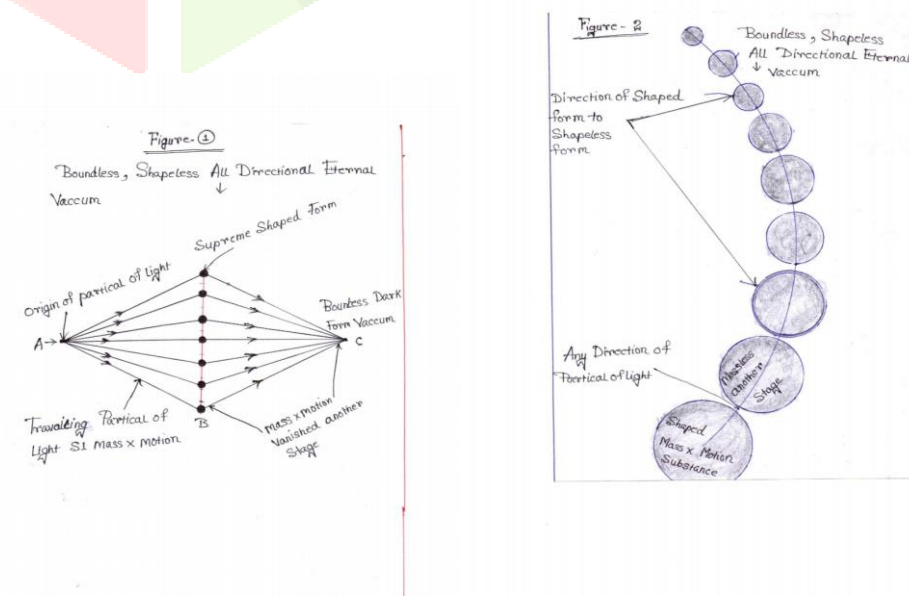

□ Sense nature of Nature /- Sense nature of Nature means---> this Sense nature here meant, Dimensions nature are arising from Soil, Water, Fire, Air, Wind's mind, Wind's intellect, Wind's haughtiness, Internal vacuum and Eternal vacuum, this ecosystem in which different Sense forms are formed depending on each other for biological decay process .

□ Fixed and moving matter of the Nature /- fixed matter is the medium through which any visible light particle moves . Sometimes fixed matter is meant by Shapeless unfavorable matter, Boundless Sky, Vacuum form darkness, Darkness form vacuum, the main element of Nature is Eternal sky, Imperishable material, Deathless sky, static Empty space, Eternal empty space, Infinity etc . By moving matter here is meant all visible light particles moving through vacuum .

**INTRODUCTION:-** There are various scientific theories and folkloric theories , theistic explanations about the origin and creation of everything in the Universe . This theory is different and evidence based from those theories .

□ **FIRST OF ALL , WHAT WAS THE BEFORE EXPANDED OF THE MATTER PARTICLE OF LIGHT IN THE VACUUM FORM DARKNESS ? ----->**

Any visible particles substance in the Nature can be change from solid to liquid, liquid to gas or vapor state. Scilicet, when iron Heated it turns into liquid iron , liquid iron can be turned into gaseous and vaporous iron , the past state of gaseous or vaporous iron is the darkness form vacuum density , which is stable lightless darkness form vacuum. When the eyes are closed the Eternal darkness and the illuminated Space that is observed when the eyes are opened , whose antiquity past, present and future are the same. And even at atomic layers empty Space that the light particles every moment leaving and changing dependent with time , motion and the origin of the particles of light from the darkness form of the empty space. All the visible shaped matter particle of light, sound, numbers and all visible and imaginary objects in Nature are designed by keeping space constant. Finally, transform into darkness form Eternal vacuum form after the light particle's velocity increased, decreasing. Any partical of light or mathematical number can not be shaped without empty Spaces in Nature and vacuum remain even if they are removed. It is absolutely impossible for the human mind and intellect to imagine anything expect boundless space of the Sky and to depict the shape of any object. Finally, transform into darkness form Eternal vacuum form after the light particle's velocity increased, decreasing.

(Figure\_\_\_1/2)

## □ SECONDLY, WHERE DID THE STATE OF LIGHT PARTICLES COME FROM IN VACUUM ?

The only entity or substance in the World that can be compared and proven with shapeless, Eternal, immortal, boundless, deathless word , it is static Eternal vacuum form darkness sky. Everything has a limit boundary of shape visible place, time, container (How the shaped light particles came to be noted in the next question). The darkness form of vacuum and particles of light illuminated vacuum does not begin at any particular place and is not limited or ended at any particular place. So one question comes, whose has no beginning , its where is the end ? The second question comes, when the boundary of the Eternal, boundless, shapeless, darkness form of vacuum ends, will something be seen ? Here the a same answer will be Empty space again after Empty space. Because ----->

If we close our eyes, singular point imagine aggregate of all the moving particle of light located in the main elements of Nature Eternal darkness form vacuum. then from that singular point the darkness form vacuum is boundless, shapeless and static. It is absolutely impossible to imagine any answer to that ends at any particular place and beginning at any particular place of the fixed darkness form vacuum. If the thought comes to the luminous form in partical of light , it will again be in any one direction of infinity direction and yet the imagined luminous form located within the boundless, shapeless Sky. That darkness form vacuum is boundless, shapeless and Imperishable in all direction, in ten direction and in infinity direction. As a single point of moving particles of light can be visualized in the main element of Nature in the Eternal vacuum form darkness and that point can be made smaller and smaller, if viewed form a more distance in the Eternal darkness form vacuum. Even the entire light of that singular point could be dissipated or removed, then the darkness form of the Sky would prevails as a boundless, shapeless, absence of light and Eternal vacuum. For example individuating in the static darkness form vacuum ----> According to the Big bang theory said to have the shape of the universe and shape is expanding like a balloon at faster than light But here it is completely different, which has no shape the main element of Nature is the darkness form of vacuum. Maybe it is possible to draw a schematic picture of the Sky as particular area as we see by our eyes , yett there is exists vacuum outside the picture. If the water of a river expands in any direction it joins the sea and that place is predetermined. Thus if the Eternal darkness form of the vacuum is placed on the example of a river , then it is absolutely impossible to come up with any schematic shape of the expression of the vacuum to vacuum. It can also be proved on the board, if any figure is drawn on the board imagining the shape of Nature and imagining where that figure is floating , then the answer is the boundless shapeless Eternal vacuum Sky. That darkness form voids and illuminated by particles of light voids is found as a constant in all Galaxies, Suns, Stars, Planets, Satellites, Electrons, Nucleus. Bounded, shaped of the moving matter Motion, Sound, Attraction and Light is located of the bounded, shaped moving matter in this static Eternal darkness form vacuum (These Motions, Sounds, Attractions and Lights are described below). Presently, origin is shaped more dynamic Kinetic matter from shaped Kinetic matter, that we can demonstrate and see. But while any one direction in the infinite direction, if particles of light is originate in the main elements of Nature static darkness form vacuum, we can prove those for example "Quantum Fluctuation" but we can not prove the origin of Visible large light particles. Because the eyes sees this clime of light through the darkness form voids in

the main elements of Nature Eternal sky and the illuminated voids by particles of light but everything eye cannot see, across the all particle of light voids of the vacuum of the darkness form in any one direction of infinity direction. There are only two types substances in Nature , 1 **Fixed, boundless, shapeless darkness form vacuum** , 2 **Dynamically bounded, shaped particles of light**. Motion, Sound, Attraction and Light are added to this shaped dynamic light particle matter. As much it is bounded, shaped and visible in empty space , to that amount it is the Darkness form vacuum substance and it is transformed into the stationary vacuum form darkness with dependent to time and motion. Shaped bounded particles of light Eg ----> Sun, Stars, Planets, Satellites , Nuclei and Electrons etc.

#### □ MATHEMATICAL PROOFS AND CALCULATIONS OF INFINITE TERMS

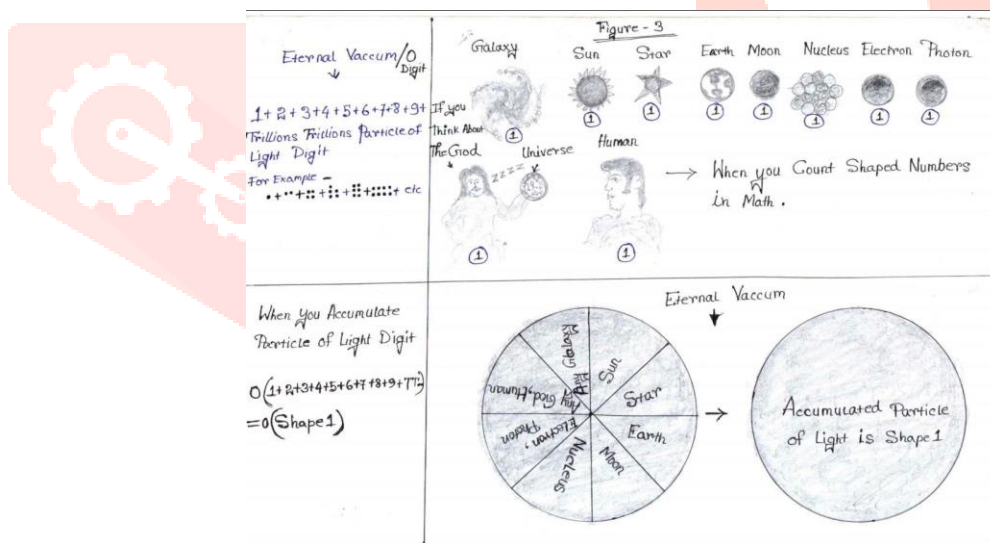

Even if a particle of light like the sun travels to the full speed of light until it vanishes, that light is not infinite. Because ----->

light continues to move in space. the particle of light lose all their light energy stillly Space is infinite, eternal and exists in the darkness form of vacuum and it will again be only one side direction of infinity direction. Notwithstanding occupies empty Space inside and outside of any moving matter. Everything that has a visible shaped, bounded is located in empty Space , we get interpreted according to the rules of Algebra ----->

All the shaped bounded material located in the empty space but if constant inside voids are outside, then all the visible shaped, bounded material accumulated summing value results in a single shape mean. Be it Words, Numbers, any imaginary shaped God, Atomic numbers , symbols and any Formula is a constant vacuum in any case. Using mathematical symbols gives -----> Normal  $1+2+3+4+5=15$  or  $(1+2+3+4+5)=15$

If Algebra rules follow in mathematics ----->  **$0(1+2+3+4+5)=$  shape 1 Or Empty Vacuum /mathematical  $0(1+2+3+4+5+6+7+8+9+.....$  Trillions Trillions particles of light Digits) = Shape 1**

Or Empty Vacuum/0 symbols ( $S1+0/EV$  ,  $S1-0/EV$  ,  $S1÷0/EV$  ,  $S1×0/EV$  ..... etc) Anytime, Anywhere, Anyplace \_\_\_\_\_Empty Vacuum or Mathematical zero symbols will be constant of the process of number shape in any mathematics.

(Figure 3)

#### □ THIRDLY, WHY IS THE EXPLANATION OF TINY PARTICLES OF LIGHT ORIGINATING FROM PARTICLES OF LIGHT MEASURED IN THE VACUUM OF ETERNAL SKY ?

Why did the expansion happened after the origin of the particles of light in Nature ? The word Why means - "What is the reason?" The main reason is origin of the particles of light in Nature ----->

The main element of Nature is the stable Eternal darkness form of vacuum , where light particles arises and disappear spontaneously like Quantum Fluctuation.

The main element of Nature fixed, Eternal darkness form vacuum is conscious even before the origin of the particles of light , present also conscious and constant, Imperishable, fixed elements. The energy of Nature is initiates energy of light in the darkness form vacuum measured in the Eternal sky. The energy elements of Nature currently refer to Motion, Sound, Attraction and Light (Discussed below about energy). Explain about

the expansion of tiny light particles from a single light particle origin in the darkness form of vacuum measured in the Eternal sky ----->

We know that any substance in Nature contains energy and the main component of Nature is the boundless shapeless, static Eternal Imperishable darkness form of voids Matter. Then the element of energy of Nature alone lives in shapeless form the main element of Nature in the Eternal vacuum form darkness. It may just be that one direction of infinity direction about the origin of our particles of light, same types could be stay other examples origin of particles form of Nature. Shapeless energy component refers to any types Motion component equivalent to the density of Sky darkness form voids of Nature. Sound is produced for Motion, Attraction is produced for Sound in the darkness form voids in infinity direction. And Light is produced for Attraction and finally the light energy of Nature is bounded, shaped, dynamic and transformed into deathless, shapeless Eternal darkness form Vacuum. There it can be said ---->

Nature's form of energy Motion is turn into Sound, Sound turn into Attraction, Attraction turn into Light. Again not all Motion becomes Sound, not all Sound becomes Attraction, not all Attraction becomes Light. So the Motion, Sound and Attraction is together located between the particle of light. This together located position is called the shaped, bounded energy form of the particles of light of Nature and the expanding energy of moving light particles in the static, Eternal sky. Finally, becomes a shapeless, Boundless state and decelerates from the shaped dynamic light to the static, shapeless form of empty Space through Attraction, Sound, Motion after the origin of shaped light matter of the Nature energy. In this way, Light turn into Attraction energy, Attraction turn into Sound energy, Sound turn into Motion energy, then the transform into darkness form vacuum or returns to previous state. If the opposite happens, i.e Light is followed by Motion, Sound, Attraction then Attraction again produces Light. Signal of concept ----->

### 1::: FIRST DIRECTION -

Motion ~ Sound ~ Attraction ~ Light { Light ~ Attraction ~ Sound ~ Motion ✓

### 2::: SECOND DIRECTION -

Motion ~ Sound ~ Attraction ~ Light { Light ~ Motion ~ Sound ~ Attraction ~ Light ✓

If happen repeatedly same process, increasing the particle of light energy form of Nature's energy and gradually that first originates form of Nature's energy is disclosed in Solidity in the cold darkness form vacuum of the Eternal sky. Inasmuch prevails both particle behaviour properties and vanishes behaviour properties between the dynamic elements Light of Nature's energy. The dynamic energy of Nature gradually transform into the visible, shaped state form of particle of Light from the energy of the shapeless phase and stay in motion. Then becomes more dynamic for the action of the Nine -layered main element of Nature after originate to tiny light particles from a single light particle measured the main element of Nature in the Eternal darkness form empty space. In the first direction of light through it takes less time to change the darkness form vacuum substance in the direction of the speed of light. In the second direction through it takes a long time, yet transform into the vacuum form darkness and even particles of light of the Nature energy can re-emerge after the light transform into vacuum form darkness but it dependent largest time. Then the elements of Nature any space shapes are formed into particles of light in the Eternal empty space, then it is moving visible particles and gradually transform into the darkness form Eternal vacuum substance when energy is throw out, then the momentum decreases. The amount of place of the shape particles of light occupy with dependent to Time, Speed is referred to as the figure. In reality all particles of light move at 0.00001% to 100th % of the speed of light. The Nature's energy of light final visible, shaped matter is a more accumulated form of the particles of light or Soil. Inasmuch, previously the original particle of light's matter was not divided, the atoms were not divided, it was only in one shape. The two main element of Nature static, shapeless voids form darkness and shaped dynamic particles of accumulated light. And another element form is water for the transformation into shaped, dynamic particles of accumulated light (Water refers to any liquid matter). In other words, Water is the second layer elements form of the particles of light converting into static darkness form in the state of speed of movement and hyper velocity. Water, Fire, Air, Wind's mind, Wind's intellect, Wind's haughtiness, Internal vacuum and the Eternal darkness form of vacuum After the accumulated particle state of light or Soil

and Layer by layer existing for this Nine-layered main elements of Nature of the transformation process in the dynamic matter. Therefore Nature can be said to have Nine layer of main element ----->

1□ The function , efforts, director of the state of accumulated particle of light or Soil is the Water. 2□ The function, effort, director of the Water is the Fire. 3□ The function, efforts, director of the Fire is the Air. 4□ The function, effort, director of the Air is the Wind's mind ( the condition when Air is not confined to a single place). 5□ The function, effort, director of the Wind's mind is the Wind's intellect (The Wind's mind state of Air is the state when mind the whole Air is flowing). 6□ The function, effort, director of the Wind's intellect is the Wind's haughtiness (It is the condition when the Air flowing in all directions in specified vacuum). 7□ The function, effort, director of the Wind's haughtiness is the its specific Internal vacuum .(where tiny sounds, air meterial are reflected and take the specific boundary). 8□ The momentum of the dynamic Wind's haughtiness is reduced and transform into the vacuum form darkness for particles of light every moment leaving and changing from the static Eternal darkness form vacuum or luminous vacuum. Thus accumulated particle of light or Soil becomes Water, Water becomes Fire, Fire becomes Air, Air becomes Wind's mind, Wind's mind becomes Wind's intellect, Wind's intellect becomes Wind's haughtiness and the Wind's intellect of the moving air transform into the static, darkness form of the Eternal vacuum for every moment leaving and changing of the Internal vacuum. These Nine-layered main element of Nature becomes interrelated . Nature consists of the Nine-layered elements stays in all the Stars outside and inside except some shaped, visible unfavorable matter. For Example -- Moon, astroids, Venus etc. The first Originates particles of light is measured in the static, shapeless, Eternal darkness form vacuum sky and from that originated all of the Sun, Stars energy of light is transform into the vacuum form darkness through the radiation decay process. Darkness form vacuum leaves to understand as seen from the nucleus quantum layer for the motion of particles of the light in the Eternal vacuum. And transformed into the stationary, shapeless, Boundless vacuum form darkness from the dynamic vanishes qualified visible particle of favorable, unfavorable bounded shaped form of light. Therefore keeping the Galactic speed of our Milky Way Galaxy constant every second, even the Nine-layered main elements of Nature located in the dynamic state of matter. This shapeless, Boundless darkness form of empty Space is the main cause of the expansion metamorphosis process into liquid matter of the bounded, shaped particles of light. Concept signal ----->

The main element of Nature Shapeless, boundless vacuum form darkness or Mathematical 0 The Nature energy ~~ motion ~sound~ attraction~ lights vanishes or particles~ ( Accumulated particle of light or Soil+0)=Water×(Water+0) =Fire×(Fire×0)=Air ×(Air+0)=Wind's Mind×(Wind's Mind+0)= Wind's Intellect×(Wind's Intellect+0)=Wind's Haughtiness×(Wind's haughtiness+0) =Internal vacuum ×(Internal vacuum +every moment leaving and changing Eternal empty Space ) = 0+ Milky Way Galaxy speed 230±km/second × Eternal darkness form Vacuum or Mathematical 0 × ÷ - + 0 = 0 ✓

The static, Eternal sky is never fargmented and it does not driven or removed, even as keeps the current Galactic momentum constant of all matter every moment leaving and changing in the Eternal vacuum. In the case of mathematical proofs the Addition, multiplication, division subtraction of any vaccum form substance with a fixed vacuum form substance is fixed Vacuum form substance. ✓

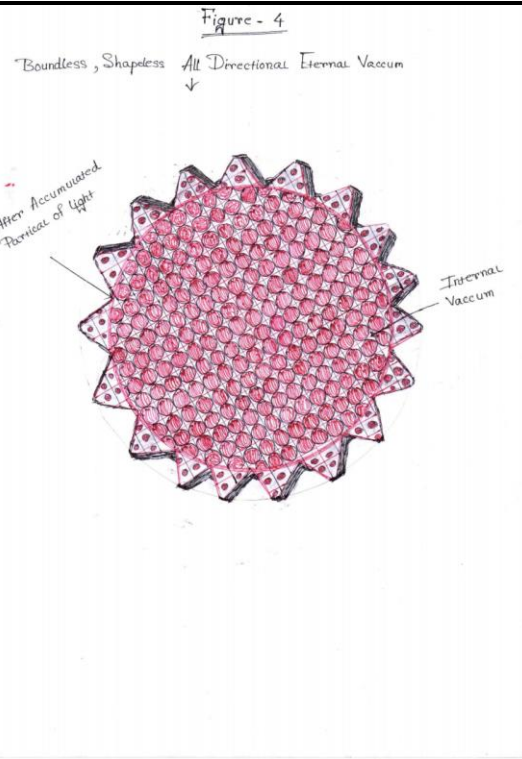

## □ ORIGIN OF FAVORABLE AND UNFAVORABLE SUBSTANCES □

First let's talk about the passage of darkness form empty Space time an element of the Nine-layered main elements of Nature and going beyond of darkness empty Space time ----->

Vacuum is maintained as a constant vacuum of the particle of light element of Nature at any time state in the absence of light for theoretical observing analysis and that is the constant, Eternal darkness form of vacuum. The Eternal, Imperishable, darkness form of vacuum illuminated by light by the eye is experienced about passing and transcending time, yett there is no answer to the passing and transcending of time finished. Because it is still, Imperishable, boundless, shapeless and constant in all directions, with or without light. It is absolutely impossible to give any example of the creation or destruction of a substance of this Nature as the first step in the teaching of science. All elements of Nature already existed in Nature in some state, there is no destruction of them, we are present only transformation of elements of Nature. What is existed when the light particles did not have velocity or time? If you ask this question, the answer is that if there is no light, there will be darkness. In the same way, all the Particle of light that are present on the body and without light particle remains the darkness form empty space and as imaginable as moving matter the darkness form of space is static, Eternal, Imperishable, shapeless, Boundless. The darkness form of vacuum doesn't move anywhere, it is doesn't come from anywhere and if empty space is systematically removed, something will remain in instead its place. In Nature the favorable matter of light is the shapeless, Eternal, fixed darkness form sky which only absorbs light and the favorable substances is the energy form of Nature shaped particles of light which only disappear or emit light radiation. Shaped, bounded visible object in Nature are both those that can absorb or emit light radiation. The particle shape of any form of energy conversion dependent motion, time and transform into shapeless empty Space form Darkness, even if the trajectory of the light particle changes in different directions. The duration of light world expansionary matter will always be speculative. Because, exactly what will be said can be more or less, because we are currently standing. The visible form of energy in Nature is Galaxy, Sun, Stars, Planets, Satellites, Electrons, Nucleus, Black whole, Nebula etc. Shaped visible unfavorable material originates from shaped favorable material. Shaped, bounded, visible unfavorable substances are Planets, Satellites, Astroids, Electrons etc. How did the origin of all these shaped unfavorable substances in Nature? And How did the expansion of Nature's light particle become fargmented and separated from each other? It is discussed in detail below ----->

Previously, the darkness form of the Eternal sky has been assumed to be the Unfavorable substance, which is the vacuum held constant in the atomic system, solar system, Stars system. And darkness form the fixed Vacuum every moment leaves and changes according to the motion of the particle of Visible light in Nature. 95±% volume of inner sky or Internal vacuum is more than volume of total sum of Visible light particle in Nature's solar system, atomic system, constellation. How did shaped visible favorable matter originate? Now let's come to this question ----->

The main element of Nature is the particles of dynamic accumulated light of Nature generated measured in the Eternal sky. And the Nine-layered main elements of Nature's light are formed for conversion into decay process before the tiny particles of light produced from those accumulated particle of light are separated from each other. That which in favorable matter still exists viz /- the accumulated particle of light or Soil Water Fire Air Wind's mind Wind's intellect Wind's haughtiness Internal vacuum and every moment leaving and changing Eternal vacuum. The main element of Nature vacuum form darkness is static, shapeless matter and shaped form of energy of Nature light particle is shaped, bounded dynamic matter. When the Nine-layered main elements are formed for transform of the light decay process inside the shaped, visible dynamic of matter particles of light, then generates internal pressure for the excessive amount of air elements to release energy inside of the particles of light. The form of energy of Nature particles of light in Nine-layers in numerous blank space, Motion, Sound in the vacuum form darkness originates of the Attraction to release energy for the reason of the Air elements of internal pressure. Break apart separated from each other into goes to far away numerous fragments for this internal pressure is generated in the particles of light of Nature to release energy and that release and transform a huge of energy. Later, the speed decreases after going far way and the form of energy of Nature of the particle of light produced from all the tiny light particles is a piece the Sun and all the others Stars.

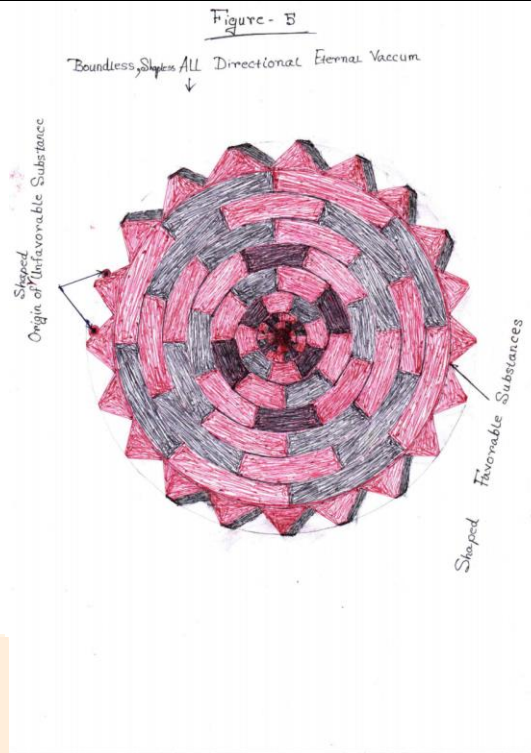

(Figure \_\_\_\_ 4).

Measured in Nature's Eternal sky, all the tiny particles of light produced from of a single particle of light are accelerated by the accumulated attraction of the Milky Way Galaxy's less attractive centrifugal force. Similarly, the centrifugal force of all Galaxies takes on the shape of a Black whole, when more attractive centrifugal force of the darkness form cool the vacuum, which is the final conversion state of the particles of light . When the particle of light called Sun, Stars are separated far away from each other, release a lot of energy, then unfavorable matter Planets, Satellites, Astroids, Electrons are formed thereafter. All that the free light energy which die away qualified these vanish into the vacuum form darkness and which do not conversion into the vacuum form darkness those becomes Planets, Satellites, Astroids, Electrons or shaped visible unfavorable matter. Thus ---->

When particles of light the energy form of Nature are fargmented through the Nine- layers , then fargmented particles part radiates a huge amount of free energy. As much zone that fargmented particles part free light energy is capable of illuminating the darkness form of vacuum. And as much the free light energy of the visible moving favorable light particles is transformed into shapeless matter in the darkness form of voids. And which have not transformed form darkness form of vacuum matter, those coupled with light absorption processes and shaped, bounded unfavorable matter is born. Visible, shaped Unfavorable matter is smaller and more dynamic than favorable matter.

(Figure\_5).

All the visible particles of light in the formation of the Planets did not completely transform into stationary vacuum matter, laureation the formation of atoms and then the formation of satellites. When a large amount of nucleus energy are released form the quantum layer in the same manner as previous process, then it is normal originating process to tiny fire form of particle from a large spherical particle form light particle and its characteristic behaviour is different. How do atoms and electrons are Originates ? It is discussed below -----  
>

All the different elementary substances Originates from Einstein's fundamental formula of shaped Visible light particle by the process of transformation of matter into other forms although separate into the Nine-layered main element of Nature. If the accumulated particles of light of the element of Soil combine with the element of Fire without the liquid element , then the element of Soil and the element of Fire are transformed into separate characteristic elemental substances. As a result of the formation of different fundamental -composite materials, then fundamental -compounds material have built extra fundamental behaviour properties and additional momentum is generated in the shaped moving particles. As a result, the nucleus of the atoms in the amount layer inside, outside in motion in the space of the Internal vacuum free of Attraction, Motion, Sound and dissipates a lot of light energy after the origin of any basic, compounds different element from the shaped visible all particle of light. The voids in the Internal vacuum expands, which break apart to produce fargmented particles (**Figure \_\_\_\_5**). The Planets are formed when the free light energy is released in the previous process from the light particles called Sun, Stars and the Planets are formed in the previous process. Same types tiny electron particles are arisen in the previous process from all the shaped visible particles of light and the fargmented particles are nucleus. How much the empty Space elements exist of the Internal vacuum in fargmented particles are separated from each other, According to quantum physics , it is known that the total surface area of the atom and the volume obtained by adding the nucleus and electrons together is 99% empty Space. That amount of free light energy of the Earth or any Planets was absorbed by the boundless shapeless unfavorable matter vacuum form of darkness but that was not happening incases with the Sun or the Stars after the birth of the electron particle. Be like rise to more duplex of accelerated and light absorbing -dissipating shaped visible unfavorable matter in the previous process from the same that amount of free light energy is produced, we know as satellites. More accelerating the interior of the Sun, Stars, Nucleus for keeping the total velocity of the Galaxy constant of this shaped visible adversary matter all Planets, Satellites, Astroids and Electrons are originates. That all the new substances transformation behaviour properties origin for mutating, those are also changeable and transformable. Shaped visible favorable, unfavorable matter motion, change,

transformation, various characteristic properties arise boundless shapeless voids forms darkness or towards returns to previous state. Secretes, behaviour performed shaped material that is produced by the decay process of light of the shapeless voids material and favorable material, it is unfavorable matter. Because, the Eternal vacuum form darkness datal process of light absorption existed in shaped unfavorable material without light dissipation . Why are Shaped visible favorable, unfavorable light particles matter opposite each other ? ----->

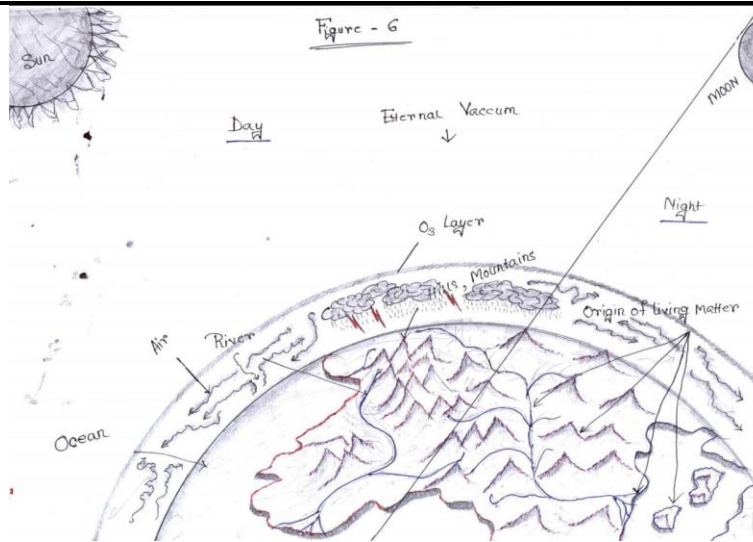

Entity of the light's absorbing of Eternal vacuum form darkness and entity of arising from favorable matter , these two types of entities exists in the form of shaped Visible unfavorable matter. Wherefore, unfavorable matter is existing in the intermediate stage of the light brightness vacuum entity of favorable matter and the Darkness form of vacuum entity. Why are the particles like Sun , Planets, Star, Cosmosology , Nucleus, Neutrons, Protons and Electrons almost spherical in Nature ? Because ---->

The shaped visible particles of light goes that towards one in the direction, thitherward exists vacuum, even at infinity direction and becomes continue metamorphosis process into vacuum form darkness. Every substance assumed a nearly spherical form for phase state of the free energy of tiny particles are produced from the particle form of Nature's energy, that infinite directions demonstrable spherical shape from all directions, hypervelocity, equally dynamic metamorphosis decay in darkness form vacuum. Did hills, mountains, plateaus, highland origination on Earth or on any Planet- Satellite originate from the process of absorption of light by the only Eternal darkness form of matter ? If you look at all the elevation of the Earth's surface together , you can understand how much role added of water transformation process in the structure of hills, mountains, highlands. Here the main role added of water transformation process of sustaining in the Nature of any highland height and helps in structure of different landforms, then works to consume Fire, Air etc. We know that higher altitude are cooler and mountain peaks are cooler with or without snow. Due to this cooling, inside the earth in any highland the element of Water, Fire, Air mixed expands more towards the cooler elements and come out. All this excess tharmal energy which is not come outside, that generates enormous pressure and free energy of the mountains above and interior. When the cool interior hits the solid material, then seismic waves are generated. Here no plate move below 100km from the surface, if they do --->(1. The Earth is round and if the tectonic plate move, a lot of blank place is generated behind the two plates and any areas to sink probability stays in the Earth for the pull of magnetic gravity. 2. We know that the temperature increases per kilometre the deeper one gose from the Earth's surface, then according to the calculation of temperature increases there would be no plates and matter would be in a molten state). Another cold form ice of water its erosion of process for Soil, Water and Fire mixed Air is locates inside the mountain and when if it come out from the Earth's surface, then a large area of land slopes up and down. In this case , there are many changes in the shape of the highland, the plains, if it is more extras amount, then moor of land of the landforms become ups and downs. Any fuel can be burned in fire by causing chemical changes without changing atoms. Where Soil has turned to Water, so it burns in Fire and any fuel containing Fire particles those turns into Air. According to the interpretation of each waves there is a separated entity of Water, which swells with the elements of Fire, Air for the process of erosion of the accumulated Soil and the attraction, momentum towards the solid Soil. Seawater has the ability to conduct electricity , the moon here acts like the magnetic attraction of electrons to protons for the upward attraction of seawater.

#### □ ORIGIN OF ANIMALS ON THE PLANET CALLED EARTH OF NATURE □

as much deeper goes into any substance, so much largest amount dynamic activity of the atomic layer for Nucleus and electrons. Located in the smallest part of the atom, yett without electrons velocity any substance moves at a speed of nearly  $230 \pm \text{km/second}$  for the decay process of the particles of light. The Earth's surface in the solar system is also dynamic for the biological decay process of humans, plants and animals. Now come, with living matter where ----->

The body form or primary state of living matter is formed by Soil, Water, Fire, Air, Wind's mind, Wind's intellect, Wind's haughtiness, Internal vacuum and every moment leaving and changing Eternal vacuum these main element of Nature and shape is formed through it, later the Senses nature is formed. In the initial stage, hills, mountains or any highlands are process of erosion by rainfall and large amount of organic sap is produced.

(Figure\_\_6)

The main element in the Earth of Nature are Soil, Water, Fire, Air, Wind's mind, Wind's intellect, Wind's haughtiness, Internal vacuum and every moment leaving and changing Eternal vacuum according to layered laws located with each other of decay processes and taking different types shaped forms. Thus the seed or living matter of the beginning of life in Nature is formed by the law of biological decay process. On Earth is darkness after day, that every moment transform into darkness voids those are stationary matter and that do not transform into darkness voids those helps in the biological structure to dissipates the thermal energy of Earth's Sense nature. The Nine -layered main element of Nature are the core of living matter and the beginning of life and the sense variations are later. These Nine -layered main entities exist in the first stage and its biological decay process is begin through the heart like an artery, vessel or germinating seed before and after the formation of senses in Nature and gradually takes a shaped form. Because -----> cardiac tube is the main supplier of oxygen, blood and food instance in animals and instance in plants is mixed male and female seeds, yett it works like a heart in the biological decay process of pervasion, osmosis. In Nature, living matter is formed by clinging to the material rich in organic juice and expands of shape of the Earth's Sense nature after the process of biological decay. The Nine -layers of main element of Nature each of these has another dimension Nature, which constitutes the Sense nature of the Earth. The process of biological decay of Sense nature arising from Dimensions nature in the early stages of the Earth can be said to be ----->

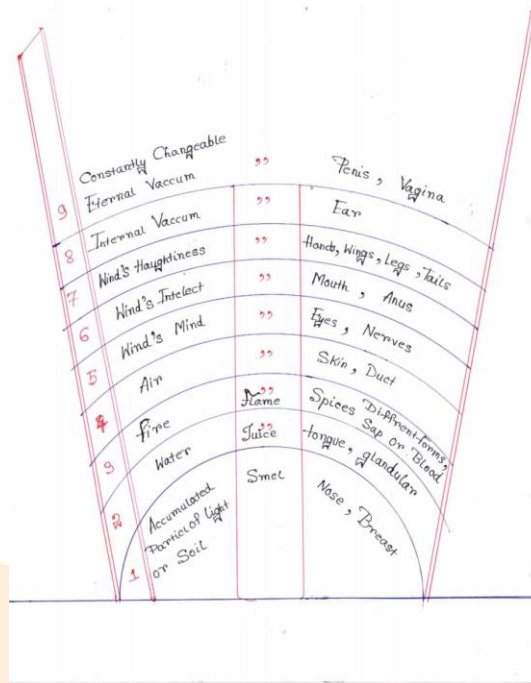

1□ In the shape of Earth's organic matter manifest dimensions of Soil is subtle smell and turns into juice. 2□ In the shape of Earth's organic matter manifest dimensions of Water is juice and turns into fire. 3□ In the shape of Earth's organic matter manifest dimensions of Fire is flame of various colors and turns into air. 4□ In the shape of Earth's organic matter manifests dimensions of Air is internal, external touch and become the Wind's mind. 5□ In the shape of Earth's organic matter, manifest dimensions in the Wind's mind are seen in different directions and become the Wind's intelligence. 6□ In the shape of Earth's organic matter manifested dimension in the Wind's intelligence are discarding and rejecting and become the Wind's haughtiness. 7□ In the shape of Earth's biological matter Manifested dimensions of the Wind's haughtiness are the motion of the Wind haughtiness, travel, give and take and become of Wind's haughtiness heat energy finish in the Internal vacuum. 8□ In the shape of Earth's organic matter dimensions manifest in the Internal vacuum is sending froth the Wind's haughtiness and turning into a static darkness. 9□ In the shape of the Earth's organic matter manifest dimensions in the Every moment leaving and changing constant, Eternal, shapeless empty space is sadness, hapiness, decomposition, joining etc Wind's

mind setup in the vacuum form darkness . production of thermal energy in the process of biological decay . (Sadness -- If Male/Female can't see and get anything of his own , Happiness -- If Male/Female sees and got something of himself owns). Therefore can be said ----->

1□ In the production of heat energy in the biological decay process of the Earth nose and breast shapes are the organs formed for subtle smell of Soil and it turn into juice. 2□ In the production of heat energy in the biological decay process of the Earth tongue and glandular shapes are the organs formed for juice of Water and it turn into Fire. 3□ In the production of heat energy in the biological decay process of the Earth different plants and animals of the same species have different forms for different colored flames of Fire and it turn into Air . Plants, animals, sap, blood becomes sap, blood of different colors for different colored flames. 4□ In the production of heat energy in the biological decay process of the Earth skin and duck tube shapes are the organs formed for external touch, internal touch of Air and it turn into Wind's mind. 5□ In the production of heat energy in the biological decay process of the Earth eyes and nerves shapes are the organs formed for look at different aspects of the Wind's mind and it turn into the Wind's intelligence. 6□ In the production of heat energy in the biological decay process of the Earth mouth and anus shapes are the organs formed for make decisions of the Air, change the direction of decisions of the Air, avoid the static state of Air in vacuum and it turn into Wind's haughtiness. 7□ In the production of heat energy in the biological decay process of the Earth legs, hands, wings, tails shapes are the organs formed for thermal energy moves of Wind's haughtiness, travel, give and take and it turn into heat energy released static state of Wind's haughtiness in the Internal vacuum. 8□ In the production of heat energy in the biological decay process of the Earth ear shapes are the organs formed for sound of the Internal vacuum, haughtiness of the Air and it transform into static, shapeless, Eternal darkness form vacuum. 9□ In the production of heat energy in the biological decay process of the Earth penis, vagina shapes are the organs formed for every moment leaving and changing Eternal vacuum, shape of object in the philosophy of happiness, sadness in the empty space, the process of eating, attaching in the production of heat energy etc. The penis, the vagina sense proves that the Eternal darkness form vacuum has something to contribute and in this sense the momentum of the biological decay process prevails in all generation, hence it is called the reservoir of all happiness.

Figure - 7

(Figure\_\_\_ 7)

#### □ HOW DID THE SENSES ORGAN ORIGINATES □

The Dimensions of nature arise from the Nine -layers basic elements in Nature and these Dimensions of nature combine when living matter is formed for the process of biological decay. Continue to produce a lot of heat energy in the process of biological decay for the Nine -layered main elements of Nature to stay together in the state of every moment leaving and changes eternal vacuum of the light absorption space of both darkness and Photon particles through the Earth's rotation Day, Night and climate change and run out of heat energy. In this way the sense growth is obtained by heat energy loss in velocity and consuming, digesting rich in nutritious of other biological substances. Unfavorable matter like Electrons, Planets, Satellites can be said organs of body are same for this both two entity of dissipating light and the entity of absorption of light in the darkness form of vacuum through the production of thermal energy of moving matter. Thus the Nine -layered main elements of Nature gradually take shape in the Sense nature (Different plant species are discussed later). The shape of the senses is unfavorable matter in the Earth of Nature. Because ----->

In this two or two types of equivalent senses response in the shape of every living matter are formed for among the senses the production of thermal energy of this two types of dynamic matter or the dissipation of light and the absorption of light in the darkness form of vacuum. Some sense eats and rejects something for increase the sense cells and produce heat energy. Consumed at the speed of the Wind's intelligence by the senses in the scent sense taste being owns content of the taste of all the senses, its through the dependent on each other in the process of biological decay time and sleeping during the silence of the senses or being stabilized by the production of excess heat energy both types entities exists in the sense. Two ear for hearing the Wind's haughtiness, sound to produce heat energy in the Internal vacuum and plants do not have ears because they do not move in one place to another place. Generates heat energy of the complexness in the biological decay process for penis, vagina of organs and conversion of heat energy into other forms when the complexness is successful. The Wind's of haughtiness for two types of reaction are formed although there are two legs and more than two legs. Of all the organs that the first is formed it is female or male of shape of form organs, that produce extra thermal energy to help form the species. Female and male shapes forms two types are formed in Nature , because ----->

The male form for the darkness form of the Eternal sky of Nature and the female form for the luminous form of the particles of visible light. Both female and male forms contain the empty Space element of the Eternal sky but the true form of the darkness element of Eternal sky in Nature is the male form. Both male and female forms contain elements of the particles of light of Nature's energy but the true particle of light luminous form

is the female form. Finally, Nose sense of the Soil are formed in the biological decay process of living matter, for which taste, dishcloth gourd and produces odour. Breathing, for dishcloth gourd every born from womb's after the nasal organs are fully formed. Now let's come, why did the death of living things ? In the Nature origin of any particle of light is the birth velocity of the particle of light in the Eternal sky, the middle stage particles of light velocity increasing and velocity decreasing and finally its particle of light is die when velocity decreases of the particle of light. The process can be understood by looking at the first figure\_\_1 in this theory. Therefore, the speed of the particles of light is born + the speed of the particles of light is high and the middle stage when the speed decreases + finally the speed of the particles of light decreases and the death of the particles of light = childhood+youth+old age. The sense form of any plant, animal or living matter begins with the Nine - layered main element of the Earth and if it does not fully converge into the static Eternal vacuum form darkness in the final state, then this energy is transformation processes return to any form through the circular. Different pulses are generated according to the air pressure for digestion, storage, combustion, movement, transmission and excretion of food by Air, Water's juice of the Soil of living matter in the process of heat energy generates in biological decay process. The sound of the sentence is produced by the heat energy production of the food, because ---->

Sentence feeling originates in the brain and nerve deutes in the brain or accumulated neurons through whereof through waves is flowing of the thermal energy. Then the voice or the palate which the breathing air hits during the pronounce of the sentence is the language of the animal. For example, Air produces sound and if communication process is start by the element of Fire of the Air, then heat energy must be need produced for produce of the Air.

#### □ HOW DID SPICES ORIGINATE □

The Nine -layered main elements of Nature or substance come in the shape of senses through the process of biological decay of each other. Namely --- Soil, Water, Fire, Air, Wind's mind, Wind's intellect, Wind's haughtiness, Internal vacuum and Eternal, shapeless darkness form vacuum. This Nine-layered main element on Earth produce nutritious food and some part Senses nature through the process of biological decay. When afore there was no Sense nature in the beginning , then first biocompatible juices area on the Earth began to be formed by the erosion of the highlands by the rainwater or living matter are formed by the mixing of air elements from Soil. Senses are formed according to the formula of heat energy production process produced from interdependent biological decay process and Dimensions nature of the Nine -layered main elements of Nature. And of all the organs, the first organ to formed is the female or male shapes form of the penis, the vagina. Consumer of first class female, male forms of the plant, animal for the production of heat energy from to omnivorous animal are formed due to the different in penis, vagina organs or the variety and characteristic properties, behaviour of the organism are formed according to form of shape. The interdependent biological decay processes of the senses help in the formation of various species of thermal energy for transformation process of light in the static, shapeless vacuum form darkness. The sense of the Internal vacuum is formed after the sense of the every moment leaving and changing Eternal darkness form of the vacuum arise in the Earth of Nature.

Thereafter, sense of the Wind's haughtiness, Wind's intelligence, Wind's mind, Air, Fire, Water and Soil are formed. The physical characteristics of the sense will change by depending on the process of heat energy production and absorption of heat energy in any womb, ovary of the Earth and the living matter will process the biological decay of the food. All plant, animal are dependent on each other in the Earth of Nature. The Dimensions nature origin from the Nine -layered main elements of Nature and the rich in organic juice of the Nature originates from the Sense nature of the senses will produce heat energy in the process of biological decay. All the form of organ new variation is different position changing into various heat energy rays for produce heat energy in the process of biological decay in darkness form vacuum. Biological decay process on the Earth is the Nine -layered main element of Nature its dimensions nature and interdependent Sense nature another direction of heat energy production and dissipation is different species of plant and animal. In other words,----->

If the animal, plant in the shape of living matter rich in organic juice produces heat energy in the process of biological decay, its particles of light is transformed into the static darkness form of vacuum. The first class of consumer plant and animal accelerate these tiny rich in organic juices of living matter or micro organisms

on the Earth to production of heat energy in the process of biological decay. The second class of consumer plant, animal accelerate these first class of consumer plant, animal for the production of heat energy in the process of biological decay. Dependent on all of these omnivorous animal accelerate for the production of heat energy in the process of biological decay. The static darkness form of vacuum, Sun, Earth, other planets, asteroids accelerate the omnivorous or human for the production of heat energy in the process of biological decay. Biological decay process on the Earth occur in the form of omnivorous. Example include epidemic, natural disaster, war etc . The reason for war is the level of human intelligence and image of mind setup level of the ego, prevails here own wish. Besides, the main element of Nature in Eternal empty space is the constantly process of transformation into darkness form of moving visible particles of light. Once many species have Originates on Earth, thereafter the penis, vagina organs are variously located in micro organisms, plant and animal and the whole body emits bodily juices. Plant, animal of female form in the womb, ovary is contained by shape of male form due to the illumined female form of shape Nature's of the particles of light and the same species of different species are produced again and again. Particle of unfavorable visible light in Nature are always moving and changing. Unfavorable substances can change time dependent according to light absorption and dissipation processes. Example ---> Electrons of different fundamental matter, organs of any plant , animal species and Planets, Satellites of Sun and other Stars have changed their form and behaviour properties according to the situation for light or food absorption process.

#### □ EXPLANATION OF TIME AND ATOMS OF ALL SHAPED VISIBLE LIGHT PARTICLES □

Time is s an important question. that depends on the transformation of shapeless darkness forms into empty Space in the decay process of the shaped form of the particles of Nature's energy. So time is not same everywhere. Shaped, visible light's particles of the matter of Nature starting to finishing journey limit i.e the trajectory from the beginning to the end of time depends on the speed of the moving light particles. Forasmuch, shaped visible favorable, unfavorable matter is keep up the Motion, Sound, Attraction and Light. The time of the light particles depends on the light absorber or absorption process of conversion into the vacuum form darkness. The main element of Nature static darkness form of vacuum time course is not existed, because time and momentum require a fixed unit need to measure time and momentum and moving light particle leaves from the which stationary empty space, this empty space is the unit element of measure of the time, momentum. That fixed Eternal darkness form of empty space does not move and that was before, then, after and even present will always be constant. Time of the particles of Visible light in Nature is now known by the conversion of the particles of light into decay processes ----->

The particles form of energy of the Nature have split twice, first in the Sun, all Stars and secondly in the nucleus of atom. The radiant energy of these atoms of favorable matter is some percentage absorbed by the visible, shaped unfavorable matter. Even so , shaped visible unfavorable matter is extremely subtle and originated so long ago, yett we passed the middle stage of the time course. According to the data obtained if the atom is interpreted in terms of the concept of the complete absorb of the particles of light ----->

Atoms of any substance consists of nucleus and electrons and if all the Particles of any atom are darkness in the form of voids or if the visible, shaped light particles are de - illumined. Then the applied energy and the free energy of the transformation into darkness form empty Space of the atom will be combined and the applied energy will increase at a double rate and after, the other two atoms are able to produce free energy in the same process.

Then through the chain reaction from one atom to two, two to four, four to eight and lastly dynamic rich of the matter particles of light is able to transform into the vacuum form darkness form. The dynamic particle of light will continue to dissipates into the stationary Eternal darkness form of vacuum after the decay process of the last recieved dynamic light particles by the finally received abundance energy.

**" 1 atom transformation into darkness form vacuum = 2 atom transformation into darkness form vacuum "**

Atoms are separated according to their negative and positive behaviour, properties like Motion, Sound, Attraction, Light etc ----->

Neutrons particle in atoms are the neutral particles , so the nucleus of atom is so variable. The reason this particle is neutral is that two types of large particles resides in the nucleus. namely - neutrons and protons.

These two types of Nuclear particles are the origin of neutrons and protons for two types of unfavorable matter (1. Particles Like Pi, mu, hyperon, meson, neutrino etc are not mentioned because , they are electrically charged particles and sub particles of protons and neutrons. 2. All that fundamental matter have only one proton - electron, those are release or dissipates huge excess energy. 3. There is a saying in physics, it is impossible to create and destroy of the atom of any substance and energy indestructible but Albert Einstein proved energy is converted from one form to another form ). Protons particles for electrons both are electrical charged particles and neutral an uncharged Neutron particles for darkness form of vacuum matter both are neutral. It also causes neutrons to rapidly change to protons, protons to neutrons both two types shaped and shapeless unfavorable matter is absorber of light energy . When electrons attract particles , those particles are protons and those that do not attract momentarily are neutron or non-charged particles. Thus the nucleus changes rapidly and nucleus is transformed into the darkness form Vacuum form. Explain according to the concept of the complete disappear of atoms of the particles of light ----->

Every atom is reaction connected of shaped visible favorable, unfavorable matter. Therefore can be said ---->  $(F \neq U)$ \_\_\_\_ Unequal meaning in electron to nucleus gaff or Space ,U- Unfavorable matter, F- Favorable matter )

1□ In any case of atoms ---->  $(F + F = U + EVS)$ \_\_\_\_ An another Unfavorable is the Eternal vacuum substance or EVS . 2□ Again if the constant Eternal darkness form vacuum is compared as positive then -->  $(U + U = F + EVS)$

The voids of the Eternal sky stays constant according to the volume of the nucleus and Favorable substance = Unfavorable substance for during that time every moment leaving and changing of the shapeless boundless vacuum until extra dynamic and strong nuclear magnetic force oposite or less of the visible shaped favorable, unfavorable matter for Internal vacuum of element of the shaped visible favorable and unfavorable matter in the voids of Eternal sky. Here fixed Eternal vacuum matter is presented as unfavorable matter namely ---> Two types of unfavorable matter is existed in the every nucleus, firstly visible shaped, dynamic electrons, secondly Shapeless static infinite vacuum matter. Therefore  $(F + F = U + EVS)$ \_\_\_\_ According to the first formula.

## Mathematics equation—

(  $F+U=EV$  ) [According to the first formula]

$\therefore P + N = EV + E$  [  $P=Protons, x=Pi-Mu-Hyparon-Neutrino-Meson-Positron, N=Neutrons, EV= Eternal Vacuum Substances, E=Electrons$  ]

Or  $EV + E = P + N$  (  $EV$  is infinity and vacuum )

Or  $EV : E = P : N$  (Both are in opposite proportions)

$$\text{Or } \frac{EV}{E} = \frac{P}{N}$$

$$\text{Or } EV \times N = E \times P$$

$$\text{Or } EV = \frac{E \times P}{N} \quad [\text{Similarly others similies can also be evaluated}]$$

$$\text{Or } \frac{E \times P}{N} = EV \quad [EV \text{ i.e taking Zero value}]$$

$$\text{Or } \left( \frac{E \times P}{N} \right)^2 = (EV)^2 \quad [\text{Squaring both gives}]$$

$$\text{Or } \left( \frac{E \times P}{N} \right)^2 = \sqrt{(EV)^2} \quad [\text{Anywhere value of Zero is irrational number}]$$

$$\text{Or } \left( \frac{E \times P}{N} \right)^{2,4,8,\dots} = \sqrt{(EV)^2} \quad [\sqrt{(EV)^2} \text{ is proved to be an atomic empty vacuum substance by the Nuclear chain reaction}]$$
