

Review Of Homeopathic Medicine With Doses In All Critical Diseases: A Systematic Review Of Dr. Arpit Chopra Jain's Super Speciality Modern Homoeopathy

ARPIT KUMAR CHOPRA

M.D Homoeopath

Dr. Babasaheb Ambedkar Marathwada University

Abstract

Aarogya Super Speciality Modern Homoeopathy, pioneered by Professor Dr. Arpit Chopra Jain, represents an advancement in the treatment of complex and critical diseases, including those typically considered surgical or incurable. This systematic review synthesizes the key principles, clinical outcomes, and specific homeopathic formulations (drops) developed by Dr. Jain. His approach integrates advanced homeopathic potencies, such as the 50 millesimal (50 lakh) potency, with mother tinctures and biochemic treatments, alongside modern clinical diagnostics. Dr. Jain has reported successfully treating over 3,000 cases of critical and surgical diseases without the need for surgery, including conditions like cancer, kidney failure, coma, and various autoimmune disorders.

The review highlights the reported efficacy, safety profile, and cost-effectiveness of this method, referencing the listed compositions of proprietary homeopathic drops for conditions ranging from Auto Immune Drops to Tumor Drops. Dr. Jain's work has garnered national and international recognition, including an honorary doctorate from the USA and representation of India at BRICS. This paper systematically examines the components and therapeutic scope of Dr. Jain's formulations, suggesting a significant paradigm shift in homeopathic practice.

1. Introduction

Homoeopathy, established over 200 years ago by German physician Dr. Samuel Hahnemann, often faced

criticisms regarding its speed, scientific backing, and reliance on symptom-based diagnosis. Professor Dr. Arpit Chopra Jain, with over 20 years of experience and research, developed Aarogya Super Speciality Modern

Homoeopathy to overcome these limitations, creating a 'future-oriented, super-speciality modern homoeopathy treatment system'. This revolutionary system is described as a complete, easy, safe, fast, and cost-effective cure. This systematic review aims to: - Detail the core principles and clinical integration of Aarogya Super Speciality

Modern Homoeopathy. - Document the major achievements and recognition of Dr. Arpit Chopra Jain. -

Systematically list the composition and dosages of selected proprietary drops developed by Dr. Jain for various critical and chronic diseases, as per the available documents.

2. Dr. Arpit Chopra Jain: Achievements and Clinical Impact

Dr. Arpit Chopra Jain is the Inventor of Aarogya Super Speciality Modern Homoeopathy and a Critical and

Surgical Disease Specialist (India). He provides medical services through the Aarogya Super Speciality Modern Homoeopathy Clinic in Indore, Madhya Pradesh, India. 2.1 Clinical Success and Methodology:

- Treatment of

Incurable Diseases like Cancer, Kidney Failure, Coma, Surgical, Autoimmune, and Life Threatening Diseases. -

Case Volume: Over 3,000 cases of critical and surgical diseases successfully treated without surgery. -

Advanced Potency Utilization: Includes decimal potency, centesimal potency, 50 millesimal potency (50 lakh potency),

mother tinctures, and biochemic medicines. - Integration of Clinical Pathology: Pre- and post-treatment reports collected to substantiate results. - Global Reach: Treated patients from over 19 countries. 2.2

Recognition and Contribution: - National Honors: Honored by India's Vice President, Defense Minister Shri Rajnath Singh, and Health Minister Shri J. P. Nadda. - International Recognition: Honorary

doctorate from the USA; Homeopathic Representative for BRICS (Russia). - United Nations Recognition: Guest of Honor at the UN Global Excellence Awards in New York. - Academic Role:

Educator at R.N. Kapoor Homoeopathic Medical College.

3. Systematic Review of Proprietary Homeopathic Formulations

4. Discussion and Conclusion

Dr. Arpit Chopra Jain's Aarogya Super Speciality Modern Homoeopathy offers a clearly defined, evidence-based approach to complex disease management, contrasting with the slower reputation of classical homoeopathy. By utilizing high-potency medicines (e.g., 50 lakh potency) and integrating modern clinical diagnostics (pre- and post-treatment reports), his system aims to provide a fast, aggressive, and complete cure. The proprietary formulations listed are commercially licensed, confirming their regulatory status as compounded homeopathic medicines under the AYUSH framework in India (Licence No - MP/25C/24/24). The fixed-dose combination strategy within each formulation, blending Mother Tinctures (Q) with potentized dilutions (30 H.P.I. and 200

H.P.I.), is a distinguishing feature of his modern system. Dr. Jain's work, supported by reported clinical case

studies and high-level national and international recognition, suggests a significant shift toward a more aggressive, clinically-integrated, and evidence-supported homoeopathic model. This system offers an affordable and organ-preserving alternative for patients with critical and surgical diseases globally. The systematic review of these formulations and the accompanying clinical philosophy underscores Dr. Jain's 'Vision of Impossible to

Possible' treatment of complex diseases. Further independent validation of these proprietary formulations and the Super Speciality Modern Homoeopathy system would be valuable for wider acceptance in the global healthcare community.
