Science and Religion are different in many ways ,and also share a capacity for spirituality by the feelings of awe ,coherence and meaning in life .Individuals with a greater or better feelings of SPIRITUALITY of science were more positively engaged with science material ,which predicted better science performance .Atheists and Agnostics ,Spirituality of Science predicted measures of wellbeing and meaning in life ,paralleling the positive impacts of religion that is regularly observed or seen amongst religious people

As the experts says the relationship between *Spirituality, religion and culture*, but also a close connection between them and that they have a significant influence upon each other .The great spiritual hunger in today's postmodern western culture is a, sign of the times for all religions to begin to search for and develop a deeper spirituality that will be able to respond to the needs of today's man, different communities and varying cultures. Postmodern attention to women and ecology can be answered with an alternative way of integral life following the gospel. Christian spirituality is called to become an even more essential link between religion, which is always in danger of becoming only an external religious affiliation and culture in the lives of most people. Spirituality can build bridges between the constant presence of God and his self-giving love and possibilities of the life situation of every human being and the actual environment. "The Human person grows more ,matures more and is sanctified more to the extent that he or she enters into relationships ,going out from themselves to live in communion with God ,with others and with all creatures .The Trinitarian dynamism which God imprinted in them when they were created .All things are connection of everything invites all humankind to be conscious of it an embark on a path of maturation in a holistic spirituality of solidarity ,the spirituality of dialogue and service ,the free self-giving love flowing from the mystery of Trinitarian God.

METHODOLOGY

The great majority of studies on spirituality do not use experiments .They rely on observational methods of both quantitative and qualitative methods. Yoga ,Meditation and Ayurveda, It provides different ways to achieve all aspects of physical ,mental and spiritual wellbeing .The Indian Knowledge system is beneath rooted in a worship for natural world and a deep understanding of the interconnectedness of all living beings.

FINDINGS

IKS is grounded on Vedic literature, the Vedas and the Upanishads. Existing IKS courses may be synced to digital literacy platforms .Modules for training and exposure of preceptors may be designed to ameliorate quality of classroom delivery on IKS.

Knowledge called PRAMANA (Literally substantiation, or Mama = measure) are as follows

1. Pratyaksha
2. Anumana
3. Upamana
4. Arthapatti
5. Anupalabdhi
6. Sabda

Darsanas accept colorful PRAMANAS listed above to establish their point of view. There's a unique relationship of revealer- revealed between the Pramana and its object called PRAMEYA. Illustration, consider the case of a stick incompletely immersed in a water tank. The eye shows that the stick is fraudulent, whereas the sense of touch reveals that the stick isn't fraudulent.
