Abstract:
The goal of this project is to find out the perception and attitude of SMEs towards Digital Marketing in Vadodara City. Keeping in mind the covid and digitalization era we conducted the survey. Had one-to-one interaction with the owners and managers of SMEs to understand more about their behavior. Digital Marketing is known for connecting brands to consumers through multiple platforms like Google, Instagram, Twitter, LinkedIn, Facebook, Pinterest.

The SME sector plays an important part in the modern era. The vital contribution of SME in economic development and socially beneficial led to the consideration of the SME sector as a field in strategic interest.

Keywords: Digital Marketing, SMEs

I. Introduction:

In this present Scenario, digital marketing has changed the perception and behavior of customers towards purchasing products. The customer engages in analyzing services and products which are promoted online and make purchasing decisions based on available online information. Various companies hire digital marketers to help businesses to make their brand presence feel in the global market and reach consumers globally. With the implementation of digital marketing in SMEs it has helped these small organizations to promote their products and services to targeted audiences and
build their digital reputation. Small Businesses at their earlier stage focus on how to get their first
group of customers. They rely on traditional forms of advertising. Digital Marketing gives small
business, no matter how new a vast overlooked marketplace.

II. Objective:
The objectives of the study are as follows:

To understand the Perception and attitude towards digital marketing by SMEs
To identify the level of satisfaction of SMEs in digital marketing over the years and expansion via.
Digital marketing.

To identify the amount of willingness in budget allocation by SMEs in digital marketing.

III. Research Methodology:

Primary data.

This data was collected by conducting a survey through a questionnaire, observation & interaction with the
SMEs.

Sample size

The data will be collected from 57 respondents in Vadodara with the ownership of their enterprise as Small
and Medium Scale.

Research Design

Research Design is Exploratory-cum-Descriptive.

Sample Selection

Sample selection has been done through simple random sampling.

STATISTICAL TOOLS USED

The collected data were tabulated and analyzed by using the SPSS package (Statistical Package for Social
Sciences). It includes the following analysis namely, Chi-Square analysis, Percentage method, diagrams, pie
charts and tables.

Tools of Analysis

1. Questionnaire

2. Percentage Analysis
IV. LITERATURE REVIEW

This reveals the study conducted by previous research of authors which is similar to our present study. There is a comprehensive discussion on theoretical and practical studies done in reference to soft drinks.

Heini Maarit Taiminen 2015 in his paper stated that SMEs seem not to use the full potential of new digital marketing tools, so not deriving benefit from the digital marketing opportunities they provide.

Mia Musso, 2017 in his study reveals that people over the age group of 50 use emails more than Instagram, they still have social media Perception and Attitude on Digital Marketing among SMEs presence.

Sandy Kosasi, Vedyanto, 2017 his research concludes that digital marketing strategy can quickly improve the capability to adapt every hindrance found in businesses of MSMEs. It is seen that digital marketing supports organizational agility by mastering the innovation in social media technology.

Kati McKeon, 2016 this research concludes that there is awareness of utilising online marketing. Technology is ever evolving, SMEs should take the advantage by sourcing time and cost effective methods to engage with online consumers.

Aries Kurniawan, Suwarno, Beni Dwi Komara, Ismi Rajani, Agus Prasetva 2019 Entrepreneurs are running their business in traditional ways only and SMEs have not utilised the technologies not for marketing or else for preparing financial Statement. The reason behind this is they have not received training from agencies to improve their ability to run the business.

Wendy Ritz, Marco Wolf, Shaun McQuitty 2018 Researchers came up with a conclusion that Small businesses found less likely to be involved in digital marketing in comparison to large businesses.

The benefit to the study for the researcher is that it helps to gain one to one experience of SMEs preferences.

This study is very significant for the marketers as well as owners in this competitive era where very few are taking advantage of digitalization.

This study is designed to provide accurate and valuable information in regard to the subject matter core red.

CONCLUSION:

SMEs are aware about digital marketing. Most of the SMEs have not taken digital marketing services. And those who have taken it are not much satisfied. But they are really interested in growing their brand via. Digital marketing that can be seen from the free consultation. In digital marketing SMEs trust Google ads more than any other marketing platform. Few of them are getting good quality customers through organic search results. On the other hand, the retail sector is finding difficulty in their sales because of cut throat competition in the online market. It has been observed that SMEs have spent some amount of money in getting online traction via. India mart, just dial and rest of the paid platforms for a few time. SMEs want long term growth with the help of digital marketing. They are ready to allocate 10-20% of their profit in digital marketing. SMEs also want to offer good quality offerings at a low price. They believe that if they spend some money probably 1-25% of their profit will get increased. Digital Marketing is a blessing according to SMEs. SMEs can get ahead of their competition by taking help from digital marketing.
